AUTOMATION STUDY

To Prepare Report

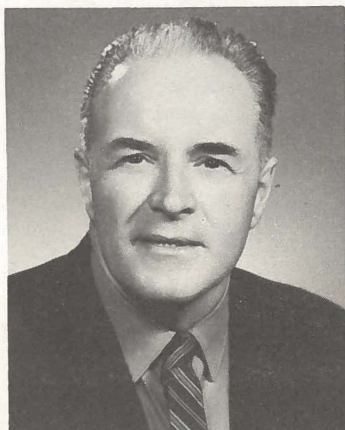

□ Dean of Arts, Prof. Tim Ryan has been appointed by the Federal Government to report on the problems created by the automation of the CNR's North Sydney Ferry Terminal in Nova Scotia.

The ferry is the main water link between Newfoundland and the mainland. As a result of the necessary modernizing process of automation, more than 700 men, representing one-third of the work force in the

community of North Sydney will lose their jobs. The sociological and economic effects on the district could be serious without a well formulated program for job mobility and relocation.

"Unfortunately, this process (automation) gives rise to difficult personal problems wherever it happens," said Dean Ryan. "Yet economic growth and the continued development of our growing standard of living depend upon our ability to maintain and speed up productivity. It is a difficult human problem faced by all industrial countries and our ability in Canada to make more efficient use of manpower while solving the social ramifications of modernization will dictate, to a great extent, our future development."

Dean Ryan was chairman of the highly-praised 'Ryan Committee' on a similar automation problem at the Manitoba Rolling Mills plant in Selkirk in 1966.

MID-CANADA CONFERENCE

□ The first session of the Mid-Canada Development Corridor Conference will be held at Lakehead University on Aug. 18-22. A pamphlet which explains the purpose of the conference was sent to all Lakehead University staff members along with this issue of LU WEEK. Interested persons outside the university who wish to receive a copy should contact the Dept. of Information Services, telephone 345-2121, Ext. 300 between 9 a.m. and 5 p.m.

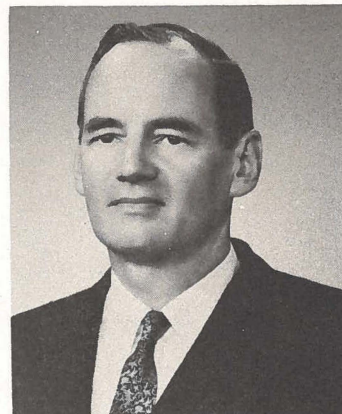

IN FUNDING RESEARCH

Charges Tokenism

□ The federal government and foreign-controlled companies were attacked for "tokenism" in the funding of research projects by the Dean of Science, Dr. John Hart during a recent lecture tour of Canadian universities.

"We're asleep on our feet," charged Dr. Hart, "and if we don't step up our industrial research and development we shall become a technically backward nation, holding our position in the world only by virtue of our enormous natural resources."

He welcomed the somewhat improved cooperation between the Canadian government, industry and the universities but charged that the government, while paying lip service to applied research and development, was discouraging universities from cooperating with industry by a restrictive policy on research grants. The subsidiaries of U.S. and European firms were also attacked for being

Dean J. Hart

"singularly reluctant to have research on Canadian problems undertaken in Canada."

Dr. Hart's tour was sponsored by the Institute of Electronic and Electrical Engineers. Dr. Hart is a senior member of the Institute and is well known in specialist electrical engineering circles. His lectures also dealt more specifically with the problems of electrical engineering in the area of electrical insulation.

FACULTY APPOINTMENTS

□ Following is a list of faculty appointments for 1969-70.

ENGLISH

Mr. Russel M. Brown, B.A. (St. Thomas, Texax), M.A. (State University, N.Y.) Lecturer
Dr. Donald S. Lawless, B.S.Ed. (Buffalo), M.A. (Niagara Ph.D. (Birmingham), Assistant Professor
Mr. Gordon D. McLeod, B.A. (Toronto), M.A. (Manitoba) Director of Residence and Assistant Professor
Dr. Edwin Moser, Ph.D. (New York), Associate Professor

CHEMISTRY

Dr. Robert Anderson Ross, Ph.D. (Glasgow), Professor

BUSINESS ADMINISTRATION

Mr. Douglas B. Evans, M.Sc. (Waterloo), Lecturer

MATHEMATICS

Dr. Paul O. Frederickson, B.S., M.A., (Maryland), Associate Professor of Mathematics
Dr. Hansjoachim Groh, Ph.D. (Frankfurt), Visiting Assistant Professor

ECONOMICS

Dr. K. C. Kim, B.A. (Korea), Ph.D. (State University of New York) Associate Professor

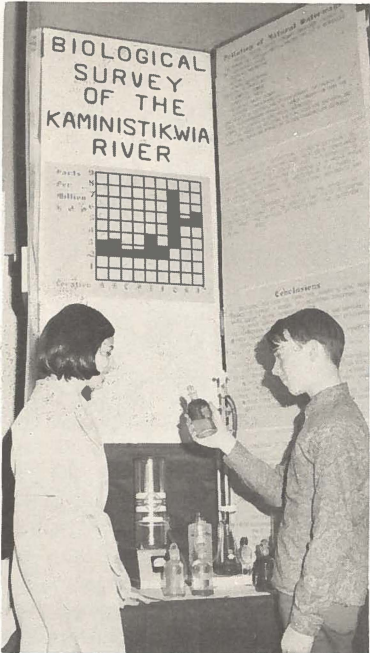

LANGUAGES

Mr. John K. Atkinson, B.A., M.A. (Queensland), Lecturer French
Mrs. Margarita Yuste, M.A. (Madrid) Lecturer - Spanish

Faculty Members Granted Leave

Mrs. J. Alleyne (English) - Study Leave
Mr. F. Anderson (Economics) - Study Leave
Dr. E. Eager (Political Science) - Study Leave
Mr. E. Green (Mathematics) - Sabbatical Leave
Mrs. A. Moscovitch (Languages) - Sabbatical Leave
Mr. R. Shankman (English) - Leave of Absence
Mr. M. Colina (Languages) - Leave of Absence
Dr. A. L. Smith (English) - Leave of Absence
Dr. G. O. Rothney (History) - Study Leave

Northwestern Ont. Regional SCIENCE FAIR

The annual Northwestern Ontario High School Students' Science Fair was held at Lakehead University on April 11 and 12. More than 65 projects were judged during the two-day event. At left, the exhibit on the Kaministiquia River is the work of 17-year-old Bill Poshtar, a Grade 12 student at Selkirk High School.

drama

□ The Cambrian Players will present "Yesterday the Children Were Dancing" a tense, controversial play by Canadian actor/playwright Gratien Gelinas on April 17, 18 and 19 in the University Centre Theatre.

The play takes place in Montreal in 1967. It presents candidly and with remarkable insight the vital issues currently dividing Quebec. Pierre Gravel, a lawyer is offered the federal justice portfolio but is unexpectedly faced with the opposing views and violent methods of Andre, his son and leader of a terrorist plot. The bitter conflict which follows brings father and son to realize the extent of their ideological commitments and reveals the complexity of emotions underlying the unrest.

Directed by Jim Foulds, the play will feature the following cast:

Don Jamieson as Pierre Gravel (a lawyer),
Pat Wesley as Andre Gravel (Gravel's elder son),
Dave Smith as Raoul Roberge (a political organizer),
George Warne as Paul O'Brien (Gravel's brother-in-law and partner),
Chuck Grieve as Larry Gravel (Gravel's younger son),
Yvonne McRae as Louise Gravel (Pierre Gravel's wife),
Judy Breakey as Nicole Chartier (Andre's girlfriend, a university student),
Margaret Page as Berthe Martin (Gravel's secretary).

Lakehead University WEEK

Lakehead University WEEK is published weekly by the Department of Information Services. Deadline for receipt of news items is 4 p.m. Wednesday of the previous week. Please submit written copy to the Information Office, Room 403 in the Library Building. Telephone 345-2121, Ext. 300.

"Wave Power — a future source of electricity" is the subject of this project by Westgate student Paul Dobrocky.

Morris Zubatuk, an 18-year-old grade 12 student from Winston Churchill designed and created the above model of a two-story residence which has captured the interest of two of his exhibiting competitors.

BOOKSTORE NEWS

□ The L.U. Bookstore reports that the annual book clean-up sale is now in full swing. Many hardcover books, both fiction and non-fiction, are selling for the price of three for \$1. There are also numerous other bargains in sale-priced academic selections, in hardcover as well as paperback editions.

The Bookstore is also making preparations to buy back used textbooks from the students. Faculty members have been requested to submit their orders for 1969-70 textbooks no later than April 15th so that the bookstore staff can determine which texts will be eligible for the buy-back. Students will therefore be able to turn some of their used textbooks into cash before they leave the campus for the summer.
