

Graduate Studies in Psychology

Areas of Study

As recommended by the Ontario Council on Graduate Studies

- Clinical
- Experimental (Animal Behaviour)
- Experimental (General)

Admission Requirements

Applicants are expected to hold an honours degree in Psychology (or equivalent) with at least a second class standing (B Average) from a recognized university.

Prospective students should have successfully completed a course in advanced statistics. Clinical applicants should have also completed a course in advanced statistics. Clinical applicants should have also completed a course in psychometrics. Applicants deficient in these courses may be required to enrol in them in addition to the Master's level courses.

Research Facilities

The Psychology Department provides study and research space in a modern building and an extensive library of psychological tests and measuring instruments for student use. In addition, students have access to the University computer system which features interactive terminals for student use at no charge.

Both animal and human research may be undertaken. The department maintains a colony of selectively bred Roman high and low avoidance conditioning, as well as Maudsley reactive and non-reactive genetic lines of rats. Animal behaviour laboratories have direct access to the university computer through terminals located in the research area.

Subjects for human research are available through the Introductory Psychology volunteer subject pool. Younger subjects may be available through the co-operation of the local school boards.

Financial Assistance

All accepted graduate students receive financial support in the form of teaching or research assistantships. In 1983-84 assistantships are valued at \$3696.00 and require 10 hours of work weekly during the eight month academic year.

Additional support is available through numerous graduate scholarships. For further information please contact:

Lakehead University

Located at the geographic centre of Canada on the north shore of Lake Superior, Thunder Bay is a thriving centre with a population of 121,000. It is a unique city, recognized as the world's largest grain port as well as a major pulp and paper manufacturing centre. Situated as it is in the midst of rugged Canadian Shield country, the area offers a multitude of recreational opportunities. In addition to excellent athletic facilities for indoor sports the city has excellent shopping, dining and cultural facilities as well including live professional theatre, a much respected symphony orchestra as well as many non-professional musical, theatrical, craft and arts organizations.

Situated on a scenic campus overlooking the city, the University is the

academic centre for some 6000 full and part-time students. Because of its size the University offers a wide range of personal educational opportunities for those who wish to join the community of active, questioning scholars working at both undergraduate and graduate degrees. The university is unique in its recreational opportunities as well. All outdoor sports, from canoeing to track and field, cross-country skiing and downhill skiing can be enjoyed either on campus or at excellent facilities within a short distance of the university.

Facilities at Lakehead include residence accommodation for over 600 students; a central complex housing lounges, shops, cafeterias, a theatre and a student pub; an extensive facility which includes an Olympic size pool; and a five-storey 500,000 volume library which is up to date in every respect.

Facilities at Lakehead University include

- Single and double room residence accommodation for over 600.
- A central complex which includes lounges, a shopping mall, cafeteria and a 380 seat theatre.
- A Science complex that houses "up-to-date" equipment.
- An athletic facility that includes an olympic length swimming pool that compares in size and versatility to any in Canada.
- A 500,000 volume library that is augmented by the inter-library loan system.
- An advanced computer system with student terminal access.
