Volume 3, No. 3

Shinerama '70

Shinerama '70 will be held at Lakehead University October 1st, starting at 10:00 a.m. in the Agora. This is the 6th annual Shoeshine Campaign in aid of the Canadian Cystic Fibrosis Foundation Research Fund. The objective this year for the National Campaign is \$20,000.00, a substantial increase from the \$10,000.00 goal of last year.

Cystic Fibrosis is a terminal disease of the lungs which affects children at a very young age. The life span of such a child is usually between 12 and 14 years. To treat a child who has Cystic Fibrosis is costly and time-consuming.

"President Tamblin, Honourary Chairman of L.U. Shinerama and Sean Bortolussi, Shinerama Poster child."

In order to stay alive a Cystic Fibrosis child must take as many as 50 pills per day, sleep in a mist tent, and breath aerosol mist through a mask at about 4 hour intervals during the day to dilate the lungs. This procedure along with physiotherapy, aids in loosening and discharging the mucus in the lungs enabling the child to breath more freely.

Kaz Miyata, Chairman of the Lakehead University Shinerama Committee reports that approximately 90% of the proceeds go to research, and only 10% go to administrative costs. Kaz urges all students to come out on October 1st to help fight this disease. Lunches, soft drinks, shoeshine kit, transportation and a dance are all provided free, for the students willing to lend a helping foot.

Music

Students and Faculty who are interested in Music as an extra curricular activity will be pleased to note that the Lakehead Board of Education's Music-Education Department is offering programs each weekday evening in the following areas:

Mondays - Orchestral instrumental and orchestra(s)
Tuesday - Wind-instruments and concert bands
Wednesdays - Choir
Thursdays - Explorations in Music (Grade 13 Credit)

For information on times, dates, places and other aspects of the programme, contact MUSIC-EDUCATION DEPARTMENT, RESOURCE CENTRE, 10 SOUTH ALGOMA STREET, THUNDER BAY "P", ONTARIO.

Campus Notes

Dr. Raymond K. Chow has been appointed Temporary Lecturer in Physics.

There was a meeting of the Senate Library Committee on Monday, September 21. The following matters were discussed: Library space and space allocation; regulations and fines; and the 1970/71 Readers Guide.

Mr. Dan Sudar, Chairman of the School of Library Technology, Lakehead University has been invited to deliver an address about the role of The Library Technician in Libraries on October 25 at the British Columbia Library Association Conference, Vancouver, B.C. The address will cover the implications of having well trained library technicians assisting the librarian at the technical level thus allowing the professional librarian more time for policy planning.

Plagiarism is a problem among all University departments and the policies of these departments are seldom similar or clearly defined. The English Department has decided to take a firm stand this year and issued in a letter to all students an official policy dealing with Plagiarism. The letter differentiated between Undergraduate courses, and Honors and Graduate courses, and consequently adopted two separate rulings. In Undergraduate Courses, no paper in which plagiarism has been confirmed will be given a grade. If plagiarism is infrequent or inadvertent, the paper will be returned to the student and will be accepted if resubmitted with the proper documentation. If a paper is substantially the result of plagiarism, the penalty will be failure of the course. In Honors and Graduate Courses, Plagiarism on any recognizable scale will result in immediate expulsion from the honors or masters program.

It is now possible that other departments will follow the English Department policy, and perhaps a uniform ruling will be reached throughout the university.

Lakehead University's "Continuing Education" program is offering two courses of special interest to those concerned with the proper use of the environment. The first, "Man and His Environment" commencing Monday, September 28th, was developed in co-operation with the Ontario Association of Real Estate Boards, and is especially concerned with the urban environment and the problems of planning and land use. Designated to meet the professional upgrading requirements of realtors and appraisers, but also open to the general public, this course is very similar to a credit course and will include assignments, tests, and a final examination. The fee is \$100.00 and the instructor is Mr. I. G. Davies, Assistant Professor Department of Geography.

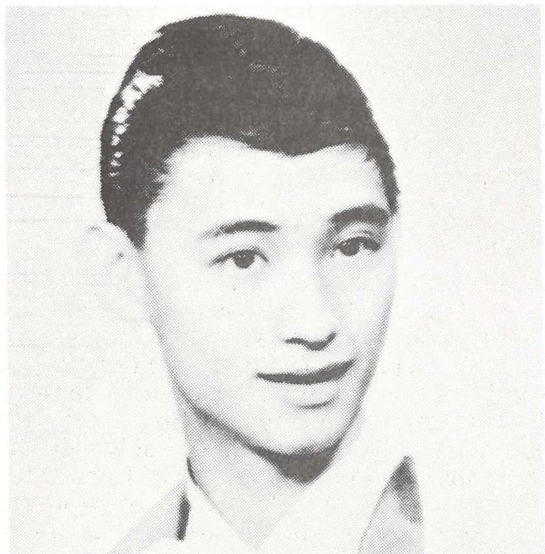

The second course entitled "The Endangered Environment" is of a more popular nature and does not include assignments, tests and examinations. Developed by professors B.A.M. Phillips of the Department of Geography and K. W. Hearnden of the School of Forestry. "The Endangered Environment" stresses a general understanding of the nature of the earth's surface and specific consideration of the uses and abuses by man of the forest, water, and soil resources of this region. The course commences Wednesday, September 30, and is divided into fall and winter terms of twelve weeks each. Fees for the course are \$15.00 per term for adults and \$3.00 per term for students.

Students may enrol for both courses on the first day of class. For further information and the "Continuing Education" brochure outlining all non-credit fall and winter courses contact the Director of Extensions, Lakehead University, telephone 345-2121, Extension 210.

Dr. Dominic Lam

Mr. D. E. Ayre, the Registrar of Lakehead University, was pleased to receive word that a former Lakehead University graduate, D. Lam, has achieved a Ph.D. degree from the University of Toronto.

Dominic Man-Kit Lam entered Lakehead University in September, 1964, and completed his Honors Bachelor of Science degree in Physics and Mathematics, with First Class Standing, in May 1967. While attending Lakehead University Dr. Lam was active in student affairs and sports, and won the inter-collegiate Table Tennis Championship in 1966.

"Dr. Lam"

Dr. Lam subsequently went on to the University of British Columbia, completing his Master of Science degree in Physics in the spring of 1968.

In the spring of 1970, Dr. Lam completed in record time, his Ph.D. degree in Bio-Physics at the University of Toronto. He has accepted a three year Associate appointment with the Harvard Medical School.

The Registrar felt Dr. Lam would appreciate hearing from his friends. His address is as follows: DR. DOMINIC LAM, Department of Neurobiology, Harvard Medical School, Boston Massachusetts, 02155, U.S.A.

Parking

As stated in Vol. 3, No. 1 of L.U. WEEK, a commission will be established to draft and administer parking and traffic regulations. When this commission is established (by mid-October), a permanent permit will be issued to all Faculty and Administrative Personnel. In fact, it will be the responsibility of this Commission to deal with all matters relative to parking and Traffic Control. However in the interim, Mr. Claude H. M. Smith, Chief, Physical Planning & Construction, asks that the Faculty and Administrative Personnel use the following guide line:

1. Faculty and Administrative Personnel who were here last year park as follows:
L.U. 1 STICKER - As last year
L.U. 2 STICKER - New lot across road from old LU 2 Lot
L.U. 3 STICKER - As last year

New Faculty and Administrative Personnel please see Mr. Gordon Gaudry for a temporary parking permit.

Mr. Smith gave the following statement: "I appreciate the fact that an interim policy for a relatively short period of time may seem undesirable, however, it was impossible to establish a Commission with representation from Students, Faculty, Staff and Administration in the time available, I sincerely request your cooperation."

Weekly Events

- September 25 I.D. Photographs will be taken in the Agora from 9:00 a.m. to 12 noon and 3:00 p.m. to 5:00 p.m.
-Archeology Club Social, Great Hall 8:00 p.m.
