Special integrated musical background for the programs is arranged by Esko Luksepp, a professional musician, who accompanies the Gymnasts in both training and public performances.

Aesthetics Gallery

The Gallery is presently exhibiting the works of two artists. H. D. Keller's "Photographic Images" is being shown along with a unique display of East Indian Watercolors, paintings, and drawings by Kailash Bagla. Both these exhibits are being held in the Gallery Room UC-2020 from 9:00 a.m. to 9:00 p.m., Monday to Friday. All of the works are for sale and lists are posted in the Gallery.

Logging Students Field Work

Students enrolled in the School of Forestry Logging Technology Program spent the past week conducting logging research studies on the woodlands operations of American Can of Canada Ltd. at Caramat, Ontario. On this first of what will be an annual logging-studies field school, the class, under the supervision of Mr. A. Bartholomew, conducted stop-watch and work-sampling studies coupled with environmental and operating condition-factors measurements on a variety of modern mechanical logging methods. These logging studies familiarized the student with the field techniques of collecting time and productivity data which form the basis of subsequent planning and control decisions at the field supervisors level.

On its return trip to Thunder Bay today, the class will spend the afternoon touring the multi-product operation of the Kimberly Clark Pulp and Paper Company at Longlac.

Early this year, most of the pulp and paper companies in the region were asked if they would be willing to assist the School of Forestry in this venture and each said that it would. This left the choice up to the school, which this year elected to accept the offer of American Can of Canada Ltd. In addition to allowing complete access to its operations, American Can also housed and fed the group, free of charge, for the entire period.
