THUNDER BAY, ONTARIO

VOL. 7. NO. 9 OCTOBER 1990

Campus Climate- more than the weather

"To escort, assist, observe and report", says Grant Walsh, Director of Services, about the role of the new student security service on campus. On Monday, October 1, a team of two student security officers, dressed in bright yellow reflector jackets, will begin their duties on campus. Members of the team, 14 men and women, were screened, given an orientation, and put on the university payroll.

The service will operate from 10 p.m. to 2 a.m. seven days a week. The primary role of the Student Security Service is to provide safe passage for students, faculty, staff and visitors within the boundaries of the main campus. A secondary function is to assist the security guards with patrols to deter crime and vandalism on campus. "Basically, we have additional eyes, ears and legs," said Walsh. "We don't want or need a SWAT team out there. We have a very beautiful campus and safety is a vital part of the total aesthetics". Paul Brezanoczy, senior security officer, is in charge of the implementation and orientation phase and is very pleased with the new service and staff. Walsh said the students are taking their responsibilities very seriously and time will tell whether the trial project will actually make this a safer campus.

Paul Brezanoczy, senior security officer, gets a good-natured ribbing from Joe Levine, one of the newly-hired student security members.

Report From the President

Dr. Bob Rosehart

ENROLMENT TOPS 4,300!

So much for my predictions for a modest increase in enrolment to 4,000 students. At the present time, our enrolment has achieved the 4,300 level and, for the most part, the additional students are distributed in such a way as to minimize room and schedule difficulties. Additional sections of some classes have been necessary, and numerous room changes have been made. The patience shown by both students and faculty has been much appreciated by the Registrar's Office.

Although Lakehead University's enrolment has much surpassed our expectations, this is not the story at all of the other Ontario universities, some of which have suffered significant declines in year one intake.

TRAVEL POLICY

Recently, the University clarified some aspects of our travel policy. This was necessary for two reasons - first, the recent audits of universities in Ontario and, the Lakehead Board of Education have pointed out some deficiencies in our current process. For example, our previous travel request form did not specify the reason for travel. This is deemed unacceptable by public audits, and it is necessary that we make the change. Further consideration is also being given to the whole process of initiating the travel request form. At the

present time, this process starts in the General Office. In most travel request systems, the form is initiated by the traveller.

A second motivation for our recent travel policy directives is the significant financial advantage to Lakehead University of directing as much of our travel business as possible to one selected carrier through a limited number of agents who act on behalf of Lakehead University. This does not imply that users have to use one airline, but every conscious effort should be made to do so. As well, a limited number of individuals in the past have preferred to use their own personal travel agent rather than the General Office. Unfortunately, with the new system, if we don't use the General Office, Lakehead University receives no financial incentives. Exceptions will be made by the Vice-Presidents for good reason and, if you wish to continue to arrange your own travel, please present such a request to the appropriate Vice-President.

It is difficult in a publicly funded institution which manages both federal (NSERC, etc.) and provincial monies not to use the system which gets the maximum advantage for the institution. I would encourage you to give the system every chance to prove itself beneficial to the University. For example, at a time when research travel budgets are tight, this system will allow additional research trips to be funded internally without additional budget costs. As I said earlier, we are looking at some further changes, and I will bring you up to date in a future column.

POLICY DEVELOPMENTS

A few new policy developments are being worked on which I hope to see finalized in the not-too-distant future. A self-funded leave program similar to

that in place with the Lakehead Board of Education is being developed, and this would apply to all University staff. Secondly, our University housing loan program is being updated, and consideration is being given to extending this program to both faculty and staff.

HEALTH AND SAFETY

Marion Muldoon tells me that, in spite of all the support in the University to provide a healthy and safe working environment, a few troublesome areas continue to exist. With trusty photographer in hand, a tour will be made for future column material. If you (or your department) don't want to receive publicity in this area, I would suggest that a CLEAN-UP would be appropriate.

Lakehead is proud of its safety record and the work of our Health and Safety Committee, but all of our efforts go for naught without your personal support.

PARKING (or looking for a spot)

One of our graduates who went on to the University of Oregon told me once that, at that campus, a parking sticker was not a guarantee of a parking place, but rather like a licence to hunt for one. Improvements have been made this year to the Bora Laskin Lot and, by the end of October, the new lot should be paved (and plugs installed) at the back of Lot 13. Until then, the best approach is to avoid the 8:30 a.m. rush.

NEW ONTARIO GOVERNMENT

By the time you read this, the new Ontario Government will be sworn in, and we will have a new Minister of Colleges and Universities. I am optimistic that the new government will offer enhanced support to both educational and regional development initiatives in northern Ontario. More will be said about this in a future column.

Congrats!

First aid training is available on campus and 19 university employees successfully completed the Standard First Aid course last spring. Top row, left to right: Fred Anderson, Darlene Yahn, Darlene Yakimoski, Karen Merkley and Norm Galloway. Bottom left to right: Dave Mueller, Warren Paju, Frank Sebesta, Richard Beach, Paul Brezanoczy and Dave Corbett. Certificates were presented by Fred Poulter, VP Administration, bottom far left.

Another record-breaking year for student enrolment

For the first time in its history, Lakehead University's full-time enrolment has surpassed the 4,000 mark. According to Registrar, Pentti Paularinne, the end of September figure stands at just over 4,300. This is the third consecutive year that the university has broken enrolment records. On November 1, 1988 the university experienced an 11.4% increase with 3,726 students while the 1989 figure reached 3,813, a 2.3% increase. When asked what factors contribute to the increased enrolment the registrar said, "increased promotional activities played a role, especially Silver Jubilee activities, and strong programs in student services. We also benefit from a continuing trend wherein students are seeking smaller universities".

Lakehead University leads all Ontario universities with the largest percentage increase in applications from high school students. First year enrolment increased by nearly 10% with 1,493 students registered full-time. This figure does not include the 300 students registered in the one year bachelor of education program. Preliminary part-time enrolment figures point to a moderate increase in the number of part-time students which was 2,100 in 1989. Over 700 of that number were students taking courses at 21 sites throughout north-western Ontario and an additional 250 studied at home through Distance Education.

Very encouraging increases were experienced in the following targeted areas: Forestry up 63%, Outdoor, Recreation, Parks and Tourism up 57%, Science up 28.8%, the Bachelor of Engineering up 10.4%, HBScN up 17%.

Stiff competition continues for entrance to the 1-year BEd program which is available for students who hold undergraduate degrees. There were 5300 applications for 250 spots which expanded to 300 due to an increase in the number of acceptances. In response to a question about the selection process, the Registrar said that Lakehead University places primary emphasis on marks, however, personal statements are also considered.

Age demographics are not yet available, but last year close to 80% of the full-time students were under 30. The figures changed dramatically for part-time students, with more than 80% between 20 and 50. The national trend shows the age of university students increasing. There are more than 60 students over the age of 60, taking advantage of free tuition.

Construction of the Student Centre and Regional Education Centre is progressing "right on schedule" for completion in September '91. It's certainly great timing with the influx of a record-breaking number of students.

Parent Orientation Program a Success

Dave and Vangie Bjorkman had a few concerns when their daughter headed off to university. When an invitation to attend Parent's Orientation arrived, they jumped at the opportunity. "I had a lot of preconceived notions about what university would be like. Maybe I was associating universities with radicals, but this orientation has shown me that university isn't what I thought." It was music to the ears of the university community to hear parents say "We like the atmosphere, you're not a number at LU".

Approximately 250 parents, more than half from out of town, attended orientation activities which included a sample lecture, campus tour, the new parent handbook, do's and don'ts from students and informal meetings with support staff. Parents were concerned about money, accommodations, course selection and how their sons and daughters would adjust to their new lives. The message they heard over and over was "Expect change. That's the norm."

"We had a tremendous turnout for our first year" commented Joy Lawson, Director of Student Services. "Their presence and positive feedback validated our belief that a parent orientation is a necessary service".

Parents listen (keeners even take notes) during "lectures" at Parent Orientation sessions.

Alice Greer

Sister Alice Greer (ex. 8002) is the new chaplain in the Counselling and Career Centre. Originally from Thunder Bay, Greer left the city in 1977 and joined the Sisters of St. Joseph, an order based in Sault Ste. Marie. In Sault Ste. Marie she took courses in theology at St. Paul's University. Counselling has played a major part in Greer's work experience. She has a diploma in Social Work from Confederation College and received her BA in psychology from Lakehead in 1988. She spent a number of years in private practice working with families and couples as well as counselling people with addictions at the Smith Clinic. Greer points out that the trend towards traditional teaching and nursing professions for Sisters is shifting. "We have a lawyer, a doctor, even an opera singer but being chaplain at a university is the first for our community". Greer's leisure pursuits include tenting, fishing, all season skiing, playing guitar and woodworking. The Chaplaincy Office offers spiritual counselling on campus and services each Sunday, 7:00 pm at the Avila Centre.

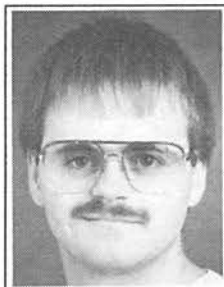

Dan Rice

Dan Rice (ex. 8084) joined Student Services as the Native Support Services Co-ordinator. Rice received his Bachelor of Education degree from Lakehead University at the recent convocation and his Bachelor of Arts degree from Algoma University College in Sault Ste. Marie. Rice is a status Native Canadian (Onkwehonweh - original people) and belongs to the Kahnawake Band in Montreal. Since embarking on his career, Rice has been involved in three specific areas. His background is in family, marriage and career counselling, and has worked in marketing/retail sales, at one point in a marketing position at Sault College. He has been "in front and behind the radio mic and the tv cameras", most recently at CBQ Radio in Thunder Bay. Away from work Rice spends time with his wife and five children, plays basketball and classical and pop guitar. An avid reader, Rice recently picked up *Honour the Sun* by Ruby Slipperjack-Farrell (his predecessor at Native Support Services) and has put her at the top of his list of favourite authors.

Glenn Payne

Glenn Payne (ex. 8783), recently hired in the Remote Sensing lab at CARIS feels at home in his new position. "I did my undergrad thesis with CARIS". He graduated with his HBSc in Forestry at the 1990 convocation. Originally from Corner Brook, Newfoundland, Payne graduated with a forestry technician diploma from the College of Trades and Technology in St. John's and worked in the forestry field for a number of years. He decided to return to school for his degree and chose Lakehead because of its college transfer program. In the past Payne has been a competitive power lifter competing in the '85 and '87 World Powerlifting Championships and winning the National Championships in 1987. Although he does not plan to compete in the near future, Payne has recently returned to powerlifting's rigorous training regimen.

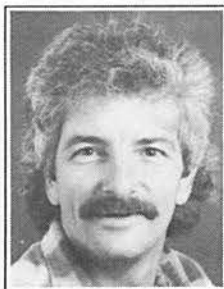

Joanne Andrew-Cotter

Joanne Andrew-Cotter (ex. 8729) has made a recent move from the Centre for Northern Studies to the Library. She is presently serving as secretary to the librarians and relishes her new position. "It's so busy, especially now that the students are back". Born and raised in Thunder Bay, Andrew-Cotter graduated from Hammarskjold High School. She has taken a few interest college computer courses in the past and would like to continue part-time studies at LU. Andrew-Cotter spends her spare moments sewing, knitting and crocheting. Depending on the season, she also enjoys downhill skiing and waterskiing. Andrew-Cotter is presently making plans for her wedding in 1992.

Derrik Patola

Derrik Patola has recently joined the Audio-Visual Department in the area of Computer and A/V Equipment maintenance. The university environment is a definite change from Patola's 13 years as a mechanic with a local car dealership and he enjoys the new environment. "Everything is interesting and diverse and you're constantly meeting fascinating people". Now that he has settled into his new job, Patola is looking forward to bagging the elusive moose this hunting season. "I live for the outdoors". Patola plans to spend his winter leisure time with his two children.

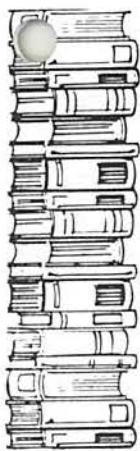

B.K. Kent

Dr. Beverley "B.K." Kent (ex. 8338), new associate professor of philosophy, is a world traveller who looks forward to rooting herself at Lakehead University. Growing up in New Zealand, Kent left the country after her initial schooling and travelled the world. "I still wasn't ready to go home so I spent three more years in London (England)". Kent eventually moved to Montreal, attending Sir George Williams College (now Concordia University) at night. She discovered her taste for philosophy at Sir George and received a BA. Kent then attended the University of Waterloo where she received her MA and PhD. After teaching in New Zealand and Australia, Kent returned to Canada briefly for a posting at Simon Fraser University followed by six years in the U.S. Kent is the author of a book entitled *Logic and the Classification of the Sciences*.

People, Papers/Publications & Special Projects

Dr. S. A. Mirza, Professor of Civil Engineering was recently elected, for a two-year term, the Chairman of the Joint Committee on Reinforced Concrete Columns of the American Concrete Institute (ACI) and the American Society of Civil Engineers (ASCE). The Committee's mission is to review and correlate information on the analysis and behaviour of reinforced concrete columns and frames including the methods required by various structural codes, to encourage experimental and theoretical research on column and frame behaviour, and to propose provisions for design of columns.

The members of an ACI or ASCE technical committee are elected internationally on the basis of their expertise in the area of the committee's mission. The Committee on Reinforced Concrete Columns is currently composed of fifteen voting members and five associate members.

Dr. David Nock, Professor, Sociology read his paper "Star-Wars: Social Construction of Reputation in English-Canadian Sociology" on May 28 at the 25th annual meeting of the Canadian Sociology and Anthropology Association held at Victoria, B.C. in conjunction with the Learned Societies. He also organized a session with the title "Founding Figures and Social Context in the Developing Canadian Sociology Tradition" and acted as discussant for a session dealing with Ethnic Minorities in Canada.

Renate Eigenbrod, Department of English, presented an invited paper entitled "Canadian Indian Literature: Insights into Indian-White Relationships" at the National Library in Ottawa on June 19, 1990. The event was sponsored by the Embassy of the Federal Republic of Germany.

Dr. Stephen McBride, Department of Political Studies, recently presented a paper "Authoritarianism without Hegemony? The Politics of Industrial Relations in Britain" at the annual meeting of the Canadian Sociology and Anthropology Association, in Victoria British Columbia. Dr. McBride is also the co-author, with Dr. Bruce Muirhead (history) who presented the paper, and Dr. Kjell Lundmark (Political Science, University of Umea, Sweden), of "Politics versus Markets: Employment Strategies in Peripheral Regions", presented at

the Conference on Unemployment in Peripheral Regions, Antigonish, Nova Scotia, June 1990.

Dr. Yves Prevost had one refereed article published in The Canadian Entomologist 122:441-447 titled Spruce Cone Axis Midge, *Dasineura rachiphaga* Tripp (Diptera Cecidomyiidae), in cones of black spruce, *Picea mariana* (Mill) B.S.P." and one symposium paper published titled "Environmental architecture Preventing loss of seed production to insects in black and white spruce seed orchards in West R.J. (ed.) the Proceedings of a Cone and Seed Pest Workshop in St. Johns Nfld. 1989.

He also presented two posters and one paper at the 19th International Union of Forest Research Organizations held in Montreal from August 5-11 1990. Poster 1 School of Forestry Lakehead University educational programs; poster 2 "Are black spruce cone and seed insects threatening forest regeneration?" and one paper "Preventing loss of seed production by insects in black and white spruce seed orchards".

Dr. Jim Smithers of the School of Outdoor Recreation, Parks and Tourism was the keynote speaker at the Annual General Meeting of the Alexander Mackenzie Trail Association in Vancouver, British Columbia on Saturday, September 15, 1990. The address was hosted as a public event by the Vancouver Museum. In conjunction with the address, a Proclamation from the Government of British Columbia was presented to the Alexander Mackenzie Trail Association regarding the dedication of the British Columbia section of the proposed Alexander Mackenzie Voyageur Route from Lachine, Quebec to Bella Cool, British Columbia. In addition, the new Alexander Mackenzie Voyageur Route brochure which details the 1989 to 1993 Canada Sea-to-Sea activities was presented under the auspices of the Canadian Parks Service, the National Film Board and the British Columbia Ministry of Municipal Affairs. Dr. Smithers was also invited to participate in the arrival of the Simon Fraser Brigade at the end of its 10 day voyage down the Fraser River. The expedition was part of Simon Fraser University's "CAMPAIGN FOR THE FUTURE" promotional activities.

Mr. Michael Boss, Department of Visual Arts is presenting an exhibition of recent paintings at the John B. Aird Gallery in Toronto, Ontario. The exhibition was from September 7 - 29, 1990.

Michel Morton, School of Nursing, recently delivered papers at two conferences. On September 22, she presented the

paper, "Assisting Student Community Health Nurses to Increase their Cultural Sensitivity to Canada's Native People", at the third provincial conference on multicultural health, Partnerships in Health III: Cultures and Health Leadership and Innovation in Multicultural Health held in Hamilton. On October 13 she presented the paper, "Facilitating Contextual Literacy for Student Community Health Nurses" at the conference, Contextual Literacy Writing Across the Curriculum, at Laurentian University.

Appointments

Congratulations to **Dr. G. Borradaile** on his appointment to the NSERC Operating Grants Selection Committee for 1990-1993 in Ottawa.

Dr. Borradaile has published 62 Geophysics and Geology papers in peer-reviewed journals and he holds Ph.D. and D.Sc. research degrees from Liverpool University, U.K.

Dr. J. E. (El) Molto, Professor and Chairman, Department of Anthropology, was appointed to a 1-year term with the Ontario Heritage Foundation.

Awards

Dr. Henry (Hank) Akervall, Outdoor Recreation Parks and Tourism, will be inducted into the Michigan Tech Sports Hall of Fame. Induction ceremonies will take place October 20 in Houghton, Michigan. He will join a prestigious group of top athletes, coaches and administrators honoured over the past 100 years. Dr. Akervall received his undergraduate degree from Michigan Tech in 1962 and was named All American the same year. Dr. Akervall was inducted into the Northwestern Ontario Sports Hall of Fame in 1988.

Ina Chomyshyn, Director of Resource Centre of Occupational Health and Safety, has been granted the designation "Registered Occupational Hygienist" by the Canadian Registration Board of Occupational Hygienists. There are only 200 ROHs in Canada.

PUBLIC LECTURE

Speaker: **DR. JOHN GRANT**
Head, Department of
Classics, University of
Toronto

Subject: **ILLUSTRATIONS IN
CLASSICAL BIBLICAL
MANUSCRIPTS**

**MONDAY, 15 October, 1990
8 PM**

Sponsored by the Department of
Languages and Classical Association
of Canada

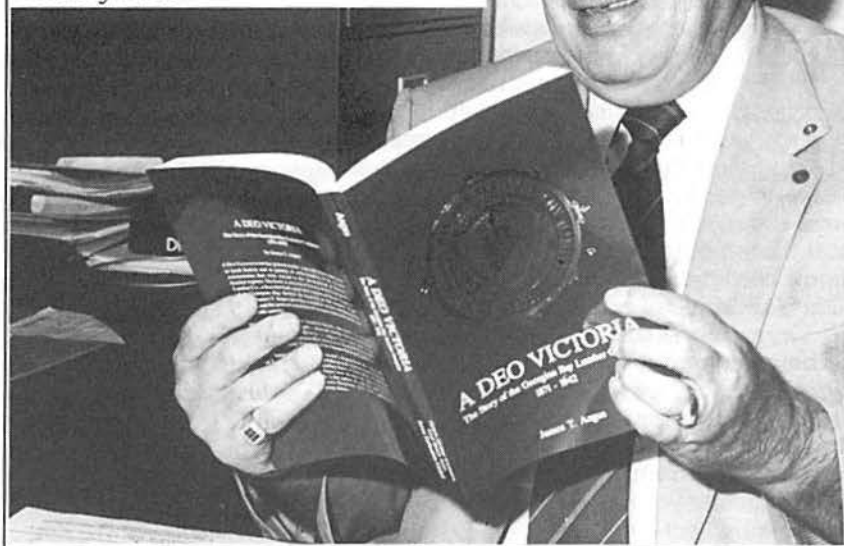

Another history book for Angus: *A Deo Victoria*

"When I was a boy, growing up in the tiny community of Big Chute on the Severn River in the 1930's, the fabled Georgian Bay Lumber Company was often spoken about by our elders. Even though the company had not logged the river for over forty years, there were plenty of relics around to confirm the loggers' one-time existence".

These stories and "artifacts" representing the past glory of the Georgian Bay Lumber Company, sparked the interest of Dr. James T. Angus, professor of Education at Lakehead, and inspired him to write a book on the subject. Written for the general reader, *A Deo Victoria: The Story of the Georgian Bay Lumber Company 1871-1942* is the history of a business that had a powerful impact on the development of the Georgian Bay district. The Georgian Bay Lumber Company was the largest and oldest company of its time, having been formed through the amalgamation of original Georgian Bay sawmills.

The book is not just a record of the development of the company, but a chronicle of the fortunes and misfortunes, successes and failures, of a group of 19th century entrepreneurs, whose sole motive for exploiting the forests was the acquisition of wealth. This book will appeal to those interested in local history and gaining an understanding of the resource communities that were crucial to the development of Ontario's frontier regions.

A Deo Victoria, published by Severn Publications, is Dr. Angus' second book about Ontario history. His first book, *A Respectable Ditch: A History of the Trent-Severn Waterway 1833-920*, was published in 1988 by McGill-Queen's University Press. Both are part of the Ontario Heritage Foundation's Local History Series.

Health Services Log: 12,500 client visits and 9,000 telephone calls

A few members of the health team: left to right, relief nurse Sandi Covino, Dr. David Legge, clinic physician, Jessie Sutherland, Health Unit manager, and receptionist, Pat Coates. Part-time students will be assisted with the addition of more evening clinics.

It may be a dubious honour, but Health Services can certainly win the award for busiest office on campus. At the helm is a soft-spoken, hard-working nurse who's been at LU since 1969. In a gentle brogue, she talks about the changes over the years and recalls the 70's when there were 3500 students and one nurse - Jessie Sutherland.

The Health Unit now has 2 nurses, a full-time receptionist, a relief nurse and 8 local physicians offering 12 medical clinics each week. "And sometimes we're still straight out" she says.

Primarily a student health centre, personnel also take care of the health needs of staff members, with approximately 657 visits last year. Sutherland stressed that students will always have priority "but we try to help everyone". Joy Lawson, Director of Student Services, acknowledged that services are running at capacity and identified two problem areas: space and a lack of psychiatric services. "It's under review right now, but a major difficulty is the lack of space and the whole issue of confidentiality due to space limitations. In the area of psychiatric care, we must refer students to community services."

What can you expect at the Health Centre? "Anything and everything" says Jessie Sutherland stressing that they offer personalized health care which promotes the total health of the individual. Staff organize many programs including diet and nutrition, blood pressure, safe sex, AIDS awareness, alcohol and drugs. They also provide immunizations, co-ordination with labs or family physicians at home. Nurses will also make hospital or residence visits to students.

Research News

FROM THE OFFICE OF GRADUATE STUDIES AND RESEARCH

Connie Hartviksen, Interim Research Officer

Any information regarding research opportunities is available at the Research Office, or ex. 8793.

Research Opportunities

SSHRC News: An informative workshop was presented by Mrs. Patricia Dunne on September 13, 1990. Strategic and Regular Research Grants were discussed. I would like to thank all of those people who were present. Overheads are available for those who were not able to attend.

Did You Know? Professors Emeriti are eligible for SSHRC funding!

NSERC News: Ms. Erica Besso and Ms. Isabel Blain presented workshops on Partnerships, Strategies, and Operating Grants on September 21, 1990.

Special thanks to all of you who were able to attend these worthwhile sessions. For those of you who were unable to timetable this, I would be happy to discuss the details of these meetings with you.

Several NSERC site visits are scheduled over the next four months. The Research Office will be assisting in the planning and co-ordinating of these visits with the individual departments.

Did You Know? Professors Emeriti are eligible for NSERC funding! The comment I received when I asked this question of the NSERC Grants Officer was "Of course, some of our best research is done by Professors Emeriti. They are truly dedicated and are not constrained by classroom/teaching obligations".

National Research Council Laboratories

Research Associateships 1991

The National Research Council of Canada (NRC) offers Research Associateships tenable in the following NRC laboratories.

Biotechnology Research Institute
Herzberg Institute of Astrophysics
Industrial Materials Institute
Institute for Aerospace Research
Institute for Biological Sciences
Institute for Environmental Chemistry
Institute for Information Technology
Institute for Marine Biosciences
Institute for Marine Dynamics
Institute for Mechanical Engineering
Institute for Microstructural Sciences
Institute for National Measurement Standards
Institute for Research in Construction
Plant Biotechnology Institute
Stacie Institute for Molecular Sciences

These Associateships are intended to give promising scientists and engineers an opportunity to work on challenging research problems in fields of interest to NRC as a stage in the development of their research careers. At any given time, there are approximately 200 Research Associates at NRC.

Applicants should have recently acquired a Ph.D. in Natural Science or Engineering or a Master degree in an engineering field or expect to obtain the degree before taking up the Associateship.

Associateships are open to nationals of all countries although preference will be given to Canadians.

Research Associates will be offered appointments to the staff of the National Research Council on a term basis and will be offered salaries and benefits currently available to members of the continuing staff.

The initial appointment will normally be for a two-year term and may be renewed, subject to the Associate's performance and subject to the requirements of the Division. Renewals are considered annually. Partial travel allowance.

Applications must be made on special forms which may be obtained from the Research Office. Applications and supporting documents must be received in Ottawa no later than **November 30, 1990.**

Association of Universities & Colleges of Canada 1991/92 Canadian Commonwealth Visiting Fellowships

On behalf of External Affairs and International Trade Canada, the Commonwealth Scholarship and Fellowship Committee is pleased to announce that up to five Visiting Fellowships are to be awarded by Canada for the 1991/92 academic year. These Fellowships are intended to bring to Canada from other countries of the Commonwealth, persons who are prominent in any function at universities, colleges, primary or secondary schools, technical institutes or related educational agencies. The purpose of the Fellowship is to offer the Visiting Fellow the opportunity to discuss various educational matters with Canadian colleagues and to advise and be advised on techniques and problems pertaining to the particular field of interest.

In this connection, I would like to emphasize that Visiting Fellowships are intended to bring to Canada persons who are prominent in any function at educational institutions. This includes senior administrators, librarians, registrars, experts in financial aid or experts in computer systems, to name only a few. The tendency has been for universities to nominate only researchers for Visiting as well as for Research Fellowships. Over the next year, you might wish to take this into consideration.

Please note that only one nomination may be made by this university and that nomination must be signed by Dr. Rosehart. The completed nomination form must reach the Commonwealth Scholarship and Fellowship Plan, c/o Awards Division, Association of Universities and Colleges of Canada, 151 Slater Street, Ottawa, Ontario. K1P 5N1, no later than **October 31, 1990.**

Environment Canada

Great Lakes University Research fund (GLURF)

A new subvention program, the Great Lakes University Research Fund (GLURF) has recently been created.

GLURF was established by Environment Canada in partnership with the Natural Sciences and Engineering Research Council (NSERC) to promote and finance research within Canadian universities that will assist Canada in meeting its obligations under the Canada/U.S. Great Lakes Water Quality Agreement. The Fund, totalling \$4 million dollars, will be granted to university researchers over a four-year period. The competition for the fund is open to any Canadian university conducting research of direct relevance to the Great Lakes. Priority will be given to research conducted in the lakes, rivers, tributary basins and ground waters of the Great Lakes Basin Ecosystem. **The deadline for application to the Fund is November 30, 1990.** All submitted research proposals will be evaluated for compatibility with the research priorities established by Environment Canada. Proposals meeting the priorities will undergo formal peer review to be coordinated jointly by Environment Canada and NSERC.

Instructions and a summary for applying to this new program are now available at the Research Office.

Canadian Cancer Society

Stephen Fonyo Fellowship Award

The Canadian Cancer Society is pleased to announce that the Stephen Fonyo Fellowship Award is available to health professionals in a variety of different fields.

These awards have been made possible by a grant from the Government of Canada for health professionals who wish to obtain a short period of training in the cancer field. The objective of these training fellowships is to improve the candidate's knowledge of cancer. The experience might be in pain management or in any other of the activities that are carried out in a modern cancer treatment centre, including clinical research.

An applicant for the award must be a graduate of a recognized health professional education program or its equivalent.

The length of training will be determined by the qualifications and needs of the applicant and the proposed program of study. The minimum period of study will be two weeks and the maximum of ten weeks.

All successful applicants, whether physicians or surgeons, pharmacists, nurses, social workers, psychologists, chaplains, etc., will be reimbursed for reasonable living expenses for travel, tuition, lodging and meals in keeping with the Society's current practices. Those Health Professionals who are not on salary, will receive in addition, \$1,000 per week.

The fellowship will be completed in a Canadian Cancer Treatment Centre preferably in or near the community in which the applicant is located. In the event that the proposed course of study is not available in such a centre, an alternative facility may be approved at the discretion of the Selection Committee.

Application for these awards should be made at least two months prior to the date on which the applicant plans to begin training. The decision regarding an application will be made within one month of its receipt. Health professionals interested in this program may pick up a description of the conditions of the Fellowship and application forms.

The Canadian Red Cross Blood Services Research and Development Program

1991/92 Career Development Fellowship Awards

Career Development Fellowship Awards are offered for a non-renewable period up to three years to provide support for highly qualified candidates who have recently completed their formal research training and wish to acquire further experience in a Blood Transfusion Service setting. It is expected that successful candidates will engage in a career in research related to blood and blood products in Canada upon completion of their award, but this is not a condition of the award.

The value of each Fellowship is related to the major degree and experience of the applicant. The Fellowship offers a stipend based on current Medical Research Council Rates for each of the three years, as well as a first year research allowance of \$10,000. The number of awards will be no more than two in any year.

Candidates must:

- (a) hold a recent Ph.D. (or equivalent research degree) or an M.D./D.D.S./D.V.M., plus a recent research degree in an appropriate health field (minimum M.Sc.) or equivalent research experience.
- (b) not be registered for a higher degree at the time of the application nor undertake formal studies for such degree during the period of the appointment.

Candidates for Career Development Fellowship Awards are required to complete a Career Development Fellowship Award Application Form (RD30). Applications must be made through and with the support of the MEDICAL DIRECTOR of the BTS Centre at which the applicant intends to work.

Applications must reach the research and Development Administrator, National Office by mid-January 1991. Candidates will be notified of the outcome of their applications by June 1, 1991. Successful applicants can take up their appointments on or after July 1, 1991.

The John C. Polanyi Prizes, 1991

In honour of the achievement of John Charles Polanyi, recipient of the 1986 Nobel Prize in Chemistry, the Government of the Province of Ontario has established a fund to provide annually up to five prizes to outstanding researchers in the early stages of their career who are continuing to post-doctoral studies at an Ontario university. In 1991, the prizes have a value of \$15,000 each and are available in the areas broadly defined as Physics, Chemistry, Physiology or Medicine, Literature and Economic Science.

1. Any person who is planning to continue to post-doctoral studies (or has a faculty appointment) in a recognized Ontario university who meets the following criteria may apply for one of the prizes:
 - i) is normally resident in Ontario and has completed or is near completion of doctoral studies in any recognized university in the world, or
 - ii) has completed or is nearing completion of doctoral studies in an Ontario university; and
 - iii) either will have completed all the requirements for the doctoral degree by December 31, 1991, or received the doctoral degree between September 1, 1988 and the above date. (Note: applicants holding faculty appointments within these time limits may apply).
2. The prizes are awarded to assist the recipients in their research and professional development.
3. The prizes may be held along with any other financial support or research funds received by the winners.
4. It is hoped that 1991 prizes will be conferred by September 1991. No prize will be awarded without the successful applicant having completed all requirements for the doctoral degree.

Application procedures and forms are available in the Research Office. The application deadline is **January 11, 1991.**

Royal Society of Canada

Konrad Adenauer Research Award 1991

On the occasion of his visit to the University of Toronto in June 1988, the Chancellor of the Federal Republic of Germany, Dr. Helmut Kohl, announced the Konrad Adenauer Research Award. This award, established through the generosity of the Alexander von Humboldt Foundation, will be made annually to one Canadian scholar in the Humanities or in the Social Sciences. The aim of the Award is to promote academic relations between Canada and the Federal Republic of Germany. This award program will be administered by the Alexander Von Humboldt Foundation in Germany in cooperation with the Royal Society of Canada and the University of Toronto. The award has been donated for an initial period of five years and will be granted annually. The first award was granted in 1989.

The award will be made to highly qualified Canadian scholars, whose research work in the Humanities or in the Social Sciences has brought them international recognition and who belong to the group of leading scholars in their respective area of specialization. The award will be made regardless of the age, race, religion or sex of the applicants.

Canadian scholars who have been granted the award are entitled to carry out research work of their own choice at German Research Institutes for a period of up to one year. The research stay in Germany can be divided into several periods, but must commence within one year of the announcement of the award.

The Humboldt Foundation will pay the return travel costs once only for award winners and family members (provided the latter stay with them in Germany for at least three months) between Canada and Germany.

Medical and accident insurance may be provided for the award winners (and family members) if requested.

The Award winners are included in the Humboldt Foundation's sponsorship program. They will be invited to take part in all functions arranged by the Foundation.

The Konrad Adenauer Research Award will be granted by the Alexander von Humboldt Foundation.

Nominations will be made jointly by the Royal Society of Canada and the University of Toronto, and submitted to the Humboldt Foundation. At least two candidates should be nominated each year.

The Humboldt Foundation's appropriate selection committee will select the award winner. The winner of the Konrad Adenauer Research Award will be announced by the Humboldt Foundation early summer of the year.

Self-application cannot be accepted. Candidates must be nominated by this university by **December 1, 1990**.

German Academic Exchange Service

DAAD (German Academic Exchange Service) is a private, publicly funded, self-governing organization of the institutions of higher education in the Federal Republic of Germany. The DAAD has the function of promoting international academic relations especially through the exchange of students and faculty. The head office of DAAD is located in Bonn and there are branch offices in Berlin, Cairo, London, Jakarta, Nairobi, New Delhi, New York, Paris, Rio de Janeiro, San Jose (Costa Rica) and Tokyo.

DAAD grants are available to faculty and students in the United States and Canada for participating in a wide variety of academic programs. The programs and the application deadlines are listed below. Unless otherwise stated, participants in DAAD programs must hold U.S. or Canadian citizenship and must be full-time faculty members or students at U.S. or Canadian colleges or universities at the time of application.

Grants for German Studies Programs in the United States

1. Interdisciplinary Summer Seminar in German Studies for Graduate Students and Ph.D. Candidates of California at Berkeley, July 8-August 16, 1991. Deadline is March 15, 1991.
2. Interdisciplinary Seminar in German Studies for Faculty and Recent Ph.D.'s at Cornell University, June 17-July 20, 1991. Deadline is March 1, 1991.
3. Grants for teaching - Team Teaching and Guest Lectureships - Deadline is Anytime.
4. Sur Place Grants - Deadline is November 1, 1990 and May 1, 1991.

Grants for Courses in German Studies and Language in the Federal Republic of Germany

1. Deutschlandkundlicher Sommerkurse at the University of Regensburg - Deadline is January 31, 1991.
2. Hochschulsommersprachkurse at the University of Freiburg - Deadline is December 1, 1990.
3. Hochschulsommerkurse - Deadline is January 31, 1991.
4. Summer Language Courses at Goethe Institutes - Deadline is January 31, 1991.

5. Learn German in Germany for Faculty and Ph.D. Candidates - Deadline January 31, 1991.

Grants For Study, Research and Information Visits to the Federal Republic of Germany

1. Study Visit Research Grants for Faculty - Deadline November 1, 1990.
2. Research Grants for Recent Ph.D.'s and Ph.D. Candidates - Deadline November 1, 1990.
3. Young Lawyers Program - Deadline March 15, 1991.
4. Information Visits - Deadline November 1, 1990.

Annual Grants

1. DAAD - Fulbright Grants
2. DAAD - Canadian Government Grants
3. DAAD - Quebec Government Grants

Other Programs

1. Alexander von Humboldt Research Fellowships
2. Leo Baeck Institute - DAAD Grants
3. DAAD - AICGS Grant

The Institute For Chemical Science and Technology (ICST)

ICST The Institute for Chemical Science and Technology is a non-profit research institute with both industrial and academic members.

The Institute was established to contribute to the growth of the Canadian chemical, petrochemical and petroleum process industries through support of precompetitive research. The research projects funded by ICST are carried out primarily at Canadian universities. Results of this research will be further developed by member companies in order to enhance their growth and competitive position.

At the present time, ICST has identified five broad research areas:

Emulsions and Dispersions
Industrial Waste Management and Environmental Quality
Polymer Properties and Structure
Sensors Technology
Separation Science and Technology

Novel ideas of potential commercial interest to the members which fall outside the five main research areas are considered in an Open category.

This category provides funding for projects which, although outside the identified research areas, are still of potential economic or technical importance to our industrial members. In making proposals in the Open category, researchers should bear in mind the commercial interests of the member companies. In particular, projects in the following areas of industrial catalyst research will be considered:

Polymerization and Hydroprocessing Catalysis
Selective Olefin Hydrogenation
Selective Oxidation
C₁ Chemistry
Acidic and Basic Solids as Catalytic Materials

Statistical Methods in Reaction Kinetic Studies and Reactor Design

ICST invites preliminary proposals for research in the five broad categories outlined above and in the Open category. More specific information concerning the research can be obtained from the Research Office.

Please note also that ICST is much more interested in supporting a new and novel program than it is in providing incremental support to an on-going mature program. Thus it is important that the proposal be clearly differentiated from any projects currently being funded from other sources.

Typically projects are funded at a level of \$30,000 to \$100,000 per year for a period of from one to three years.

Preliminary proposals are invited and will be promptly acknowledged.

Final Submission must be received by ICST by **December 1, 1990.**

The Canadian Institute for Nordic Studies Graduate Scholarship

The Canadian Institute for Nordic Studies announces their Graduate Scholarship.

This scholarship is tenable at any recognized Nordic post-secondary institution granting an earned degree at the post-baccalaureate level in the applicant's field of study. The Nordic countries are Denmark, Finland, Iceland, Norway and Sweden, as well as the Faeroe Islands and Greenland.

The level of study is to be at the Graduate level with a degree objective granted by either a Canadian or Nordic post-secondary institution.

The field of study should be related to Nordic subjects in all fields such as the humanities, social sciences, physical/natural/applied sciences.

The following conditions apply:

- 1) Canadian citizen or landed immigrant
- 2) Completion with high scholastic achievement, the minimum of a bachelor's degree from a Canadian university or college
- 3) Evidence in writing of acceptance of proposed study or research plan by the host Nordic post-secondary institution or academic member of that institution.
- 4) Minimum of six months residency in the Nordic country while holding the scholarship.
- 5) The successful applicant will, within six months of completing the study/research projects, submit a written report to CINS.
- 6) The successful applicant will, within one year of completing the study/research project, provide an oral presentation/lecture/seminar at a Canadian university or college, or at the annual meeting of the Learned Societies or other professional association meetings.

The value of this scholarship is \$2,500 in Canadian funds.

The application deadline is **January 31, 1991**. The date of award is April 15, 1991. Please call Kris at ext. 8785.

UPCOMING DEADLINE DATES

Senate Research Committee - General Research Awards - October 10, 1990

Ontario Mental Health Foundation - Grants Program For: Applied Research and Program Evaluation Projects - October 12, 1990

Ontario Mental Health Foundation and the Alzheimer Association of Ontario - "The Alzheimer's Competition" - October 12, 1990

SSHRC Research Grants #410 - October 15, 1990

SSHRC Major Research Grants #411 - October 15, 1990

SSHRC - Strategic Grants - October 15, 1990

University Research Incentive Fund (URIF) - October 15, 1990

NSERC - **Internal** Deadline - Operating/Equipment/Renewals - October 15, 1990

NSERC Women's Faculty Awards - October 15, 1990

NSERC First Time Applicants For Operating Grants - Oct. 15, 1990

Foreign Government Awards Program - October 15, 1990

Ontario Graduate Scholarship 1991/92 Part 1 - Oct. 24, 1990

ÖSSHRC - Aid to Occasional Scholarly Conferences in Canada - October 30, 1990

SSHRC - Travel Grants for International Representation - October 30, 1990

A.U.C.C. 1991/92 Canadian Commonwealth Visiting Fellowships - October 31, 1990

Laidlaw Foundation Program; Children and Families at Risk

Program - November 1, 1990

NSERC Operating/Equipment Grants/Renewals - Nov. 1, 1990

Department of Energy, Mines & Resources (EMR) 1991/92 Research Agreements Program - November 1, 1990

SSHRC/NSERC Chairs in the Management of Technological Change - November 15, 1990

SSHRC/FCAR/NSERC Joint Initiative: This program is intended to encourage graduate students to change their linguistic milieu and their place of study from Quebec to another province and vice-versa - November 15, 1990

SSHRC Doctoral Fellowships - November 15, 1990

Alzheimers Award - November 15, 1990

International Technology Association of Canada (ITAC) Award - November 15, 1990

Ontario Renewable Resources Research Program (ORRRGP) - November 15, 1990

Ontario Graduate Scholarship 1991/92 Part 2 - Nov. 15, 1990

NSERC Postgraduate Scholarship 1991/92 - Nov. 15, 1990

Ontario Mental Health Foundation-Fellowships, Publications Program, Conference Program - November 30, 1990

N.R.C. 1991 Research Associateship - November 30, 1990

Environment Canada's - Great Lakes University Research Fund - November 30, 1990

International Society of Arboriculture: Shade Tree Research - December 1, 1990

Institute for Chemical Science & Technology - R.F.P. - December 1, 1990

Konrad Adenauer Award - December 1, 1990

NSERC/SSHRC Master's Scholarships in Science Policy - December 1, 1990

Centre for Studies in Defense Resources Management Solicited Research Program - December 15, 1990

Polanyi Prizes 1991 - January 11, 1991

A.U.C.C. Micro-Fund 1 & 2 - January 15, 1991

Canadian Red Cross Fellowship - Mid January 1991

CIDA Professional Awards - January 31, 1991

Canadian Institute for Nordic Studies Graduate Scholarship - January 31, 1991

Barton Awards - February 1, 1991

Wildlife Toxicology Fund - Open

Social Science Federation of Canada; Aide to Scholarly Publications Program - Open

SSHRC Special Awards: The Queen's Fellowships, Canadian Law Scholarship Foundation, SSHRC Legal Research Scholarship, Doctoral Fellowships in Management Studies - Open

Department of Energy, Mines and Resources; Environmental Studies Revolving Funds - Open

Canadian Department of Communications; International Cooperation Assistance Fund on New Information Technologies - Open

National Geographic Society; Research Grants - Open

Laidlaw Scholar Program - Open

North Atlantic Treaty Organization (NATO) - Advanced Research Workshops - Open

National Science Foundation (NSF) - Open, but must allow 6 months for review and processing.

International Development Research Centre (IDRC) - Open, allow 3 months for a full response.

Canadian Cancer Society's Stephen Fonyo Fellowship Award - anytime (2 months prior to when training begins)

For more information about Foundations, please contact Jo-Anne Silverman, Foundations Officer at 343-8910 or drop by the Alumni House.

WOMEN'S STUDIES PROGRAM

After a lengthy review process, Lakehead University has launched the Women's Studies Program. The program has 13 undergraduate courses in the field of Women's Studies thus offering a healthy selection for a minor.

Following the trend established by a large number of Ontario universities, Lakehead University founded the Women's Studies Study Group in 1987. The result was a forum whereby women in various disciplines could share their knowledge.

Instructors Pam Wakewich and Susan Tiura are sharing the position of Co-ordinator of the program. They will co-teach the core course which is an introductory course "exploring the past, present and future roles of women in society". Specific topics will include: historical overview of feminist theory; politics, law and the family; women, health and illness; women and philosophy; women, culture and creativity; women and science; research methodologies and women in Northwestern Ontario.

A speakers series will also complement the program and students and the public will benefit from their expertise.

SUEW RATIFIES CONTRACT

The Board of Governors of Lakehead University ratified a two-year agreement between Lakehead University and the Canadian Union of Educational Workers for the period September 1, 1989 until August 31, 1991. The agreement provides graduate students with a 7% increase in wages in year I and 4% in year II. Graduate students on assistantship will also receive a benefits package in year II that includes partial medical and vision care coverage.

Undergraduate students will receive wage increases that average 6.95% in year I and range from 4.5% to 5.95% in year II, depending on the classification.

In addition to wages and benefits, there were changes made to contract language in various articles such as appointments, postings, unpaid leaves, Union information listings, etc. New wording was also added to the agreement dealing with personal harassment and HIV-related illness.

NOMINATIONS FOR HONORARY DEGREE RECIPIENTS

The Senate Committee on Honorary Degrees is now accepting nominations for possible honorary degree recipients for the May, 1991 Convocation. Nominations, together with biographical data, should be sent to Mrs. Linda Phillips, Office of the President, by **MONDAY, OCTOBER 15, 1990.**

ALUMNI HONOUR AWARD

Nominations are being accepted for the 1991 Alumni Honour Award to be presented to an alumnus/a of Lakehead University who has made an outstanding contribution in one or more fields.

Nominations should include a one-page summary of the reason for your selection and the candidate's C.V.

Send submissions before **FEBRUARY 15, 1991 :**

The President, Alumni Association.

VOLUNTEERS NEEDED!!

Last year the Alumni Association raised over \$100,000 thanks to the work of over 80 volunteers who helped out during the annual Phonathon. We need your help again this year -- in November.

If you can spare a few evenings to call alumni in Thunder Bay, contact Frances Harding at 343-8193.

Money raised will go towards scholarships and bursaries, library acquisitions and many other worthy campus projects.

JAPANESE DELEGATION VISITS LU

Lakehead University played host to a delegation from Yanaizu, Japan on Friday, September 14. The delegation was on a whirl-wind 6-day trip across Canada and made a stop in Thunder Bay. The Japanese citizens are interested in strengthening established ties with the area. Yanaizu is located near

Gifu University, which signed a twinning agreement with Lakehead University in July.

NOR'WESTERS' NEW SEASON UNVEILED

Lakehead University's Nor'westers will likely have the Thunderdome rocking again this season if the varsity coaches have anything to say about it. The teams were introduced at a reception on September 25 and according to Clyde Tuyl, athletic co-ordinator, the season looks promising. Lou Pero's men's basketball team is expected to perform well this season because of the experience of the squad with only three new recruits added. Lady Nor'Wester basketball coach, Stu Julius, recruited hard last season and gained some valuable rookies. He predicts another win in the Ontario women's west division. Francis Clayton, wrestling coach, is optimistic about the season and believes that the LU team will fare well in competition. The women's volleyball squad has a promising roster with OWIAA all-star team member, Kelly Breutigam, and top-notch setter Kelly Williams, returning. Coach Claude Lapre predicts a strong season for the team. Also announced at the reception was the establishment of the annual John Zanatta Memorial Alumni Game, to be held this year on October 20. Zanatta, past player and coach for the Nor'Westers, died tragically in August. The Nor'Westers will retire his uniform number and establish a scholarship fund in his name.

Chief Booster, Larry Hebert, left, discusses the upcoming season with Clyde Tuyl centre and Dr. Bob (another big sports fan).

Campus Calendar

To include your Department's event or activity in the Campus Calendar, please call Flo Sherren at 8300 or mail your information to SN1002. **Deadline** for the November Agora is **October 15, 1990.**
