ROBERT McLELLAN BATEMAN
Canadian Artist

Robert Bateman is recognized as one of the world's outstanding wildlife artists. His work has brought new vitality to the field of animal art, and his astonishingly detailed and carefully composed paintings of birds and mammals have been received with enormous enthusiasm worldwide.

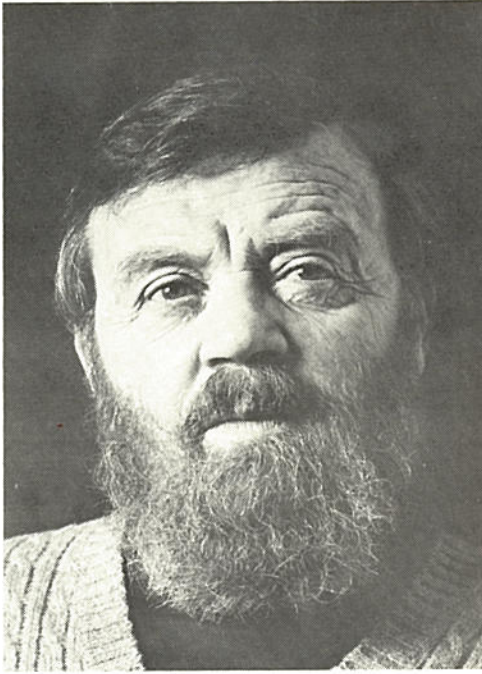

Born in Toronto in 1930, Robert Bateman became obsessed with both art and nature at an early age and most of his youth was spent sketching and studying birds and animals. During his twenties and thirties he explored a wide range of artistic styles. In 1957 and 1958, having graduated from the University of Toronto with an Honours Bachelor of Arts degree in geography, he travelled around the world. This trip was followed several years later by two years of teaching in Nigeria. It was while living in Africa that he began painting the wildlife subjects for which he is now best known. Returning to Canada he continued teaching in the Ontario school system and honing his skills as an artist until he was ready in 1972 and 1975 to present his work in major galleries in England and Canada. These exhibitions were received with overwhelming success and shortly thereafter he retired from his teaching career and began painting full time.

A traveller ever since his school days, Robert Bateman has not only explored Canada's wilder frontiers, but has also sailed and snorkeled in Australia's Barrier Reef, paddled up the Amazon, landed in a rubber zodiac dinghy in a dozen penguin colonies in the Antarctic, climbed the Himalayas of Nepal and returned again and again to the game parks of East Africa.

There is a great sense of action in Robert Bateman's work; it is characterized by superb naturalistic observation and great technical skill, fired by a powerful artistic imagination. His extensive fieldwork injects much biological and behavioural comment into his paintings. The birds and animals in his paintings are portrayed with their uniqueness in mind, not with the bias of the human observer.

In recent years, his exhibitions have attracted record-breaking crowds across North America and he has been honoured with an impressive array of awards including the Queen's Silver Jubilee Medal and the Order of Canada.

Robert Bateman and his wife Birgit live in Fulford Harbour, British Columbia.

FARLEY MCGILL MOWAT
Canadian Writer

Farley Mowat is one of Canada's best known writers. He has published over two dozen books which have been translated into some sixty languages. He is most recognized for his works on the Canadian Eskimos and for his works on the fate of endangered animal species.

He has twice won Canada's most prestigious literary prize, the Governor General's Award. He has received countless other honours, including several for his children's books. In 1981 he was decorated with the Order of Canada, the highest honour that Canada can bestow upon a civilian.

Farley McGill Mowat was born in 1921 in Belleville, Ontario. In 1928 the family moved west to Saskatchewan where he continued the interest in wildlife that he had begun in Ontario. Mowat grew up with a love, not only for wildlife, but also for reading. He began writing poetry at an early age and at thirteen he published a mimeographed magazine that he called *Nature Love*.

At the age of fourteen his great-uncle Frank took Mowat on a trip north to Fort Churchill, Manitoba to study the birdlife of the Arctic tundra. There he saw a spectacle that became imprinted in his mind, a herd of caribou moving across the vast land. Mowat was infected, for life, with "virus arcticus" -- Arctic fever.

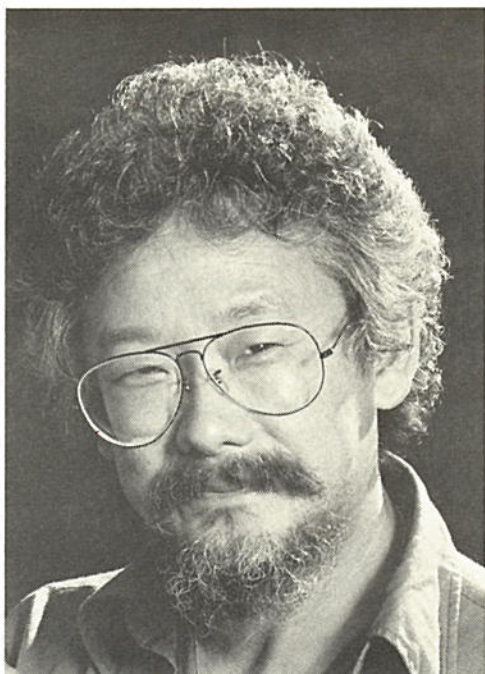

Mowat was eighteen when World War II broke out. He entered officer training with the Hastings and Prince Edward Regiment and in 1942 was posted overseas to England. In July, 1943 the regiment took part in the invasion of Sicily. It was in the midst of combat in Italy that Mowat turned to writing. His war experiences provided material for several books.

Discharged from the Canadian Army in 1946, Mowat enrolled at the University of Toronto completing his Bachelor of Arts degree in 1949. Civilization did not attract him, however, and he accepted a position as a government biologist in the Northwest Territories. His assignment was to gauge the extent to which wolves were responsible for the disappearing caribou herds. In 1963 he detailed his discoveries in *Never Cry Wolf*, a plea for the conservation of wolves in the wild. Mowat's book about his life with the wolves had been delayed because a human concern intruded into his consciousness and took centre stage in his life. An Eskimo tribe, the Ihalmiut, befriended Mowat and he learned of their desperate plight. In 1952 he published *People of the Deer*. It catapulted him to fame and into a storm centre of controversy.

During most of the 1960's Mowat lived in Burgeo, Newfoundland. He left Newfoundland, however, sad and disillusioned by an incident involving a trapped whale, which he later wrote about in *A Whale for the Killing*. In the late 1970's Mowat purchased an old farmhouse on Cape Breton Island near the sea. He became increasingly aware in

that setting that all forms of wildlife were imperiled. In 1985 he published *Sea of Slaughter* detailing the devastating destruction of wildlife on the Eastern Seaboard since the coming of the Europeans. Mowat had planned a promotional tour of the United States in April, 1985 for *Sea of Slaughter*, but was barred from travelling there by American immigration officials. In an ironic turn of fate, the publicity surrounding his case resulted in far more media attention for his book than a personal tour would have brought. Mowat has documented the entire experience in *My Discovery of America*.

Farley Mowat and his wife, Claire, divide their time between their Cape Breton house in Nova Scotia and their home in Port Hope, Ontario.

DAVID TAKAYOSHI SUZUKI
Canadian Scientist

David Suzuki, Professor of Zoology, University of British Columbia, is a Canadian scientist who is recognized for his contributions to knowledge in genetics and to the popularization of science in Canada. His genetics research has been distinguished, particularly by his description of temperature-sensitive mutations. To most Canadians, however, David Suzuki is known as a television personality. In recent years he has done much to heighten public awareness of important issues in the relation of science to society.

David Takayoshi Suzuki was born in 1936 in Vancouver, British Columbia. He graduated from London Central Collegiate Institute, London, Ontario in 1954. He continued his studies at Amherst College, Amherst, Massachusetts, completing an Honours Bachelor of Arts degree in 1958 and the University of Chicago, Chicago, Illinois, graduating with a PhD in 1961.

In 1962, when David Suzuki was a twenty-six year old Assistant Professor in the Department of Genetics at the University of Alberta in Edmonton, he was asked to appear on a local Sunday morning television program called "Your University Speaks". He was a success and before he left Edmonton for the University of British Columbia in Vancouver at the end of the academic year, he had given seven additional lectures. This was the beginning of a spectacular career as the most successful popularizer of science in the history of Canada.

While continuing his university teaching and research in genetics, Suzuki wrote widely on science and science policy. The television series "Suzuki on Science" began to make him a public figure in 1971. In 1976, he created the radio series "Quirks and Quarks". At this point Suzuki had already launched a notable career as a geneticist and some academic colleagues criticized his broadcasting as a waste of his talents, but Suzuki was convinced that public awareness of science would contribute to both better science policies and an enriched culture. "The Nature of Things", which Suzuki has hosted and helped produce since 1979, draws an audience of approximately 1.3 million. The real message of "The Nature of Things" in Suzuki's view concerns the nature of thinking. His rare combination of personal charm and scientific ability, as manifested in the series, has made Suzuki a unique figure in English-speaking Canada.

David Suzuki has been honoured with an impressive array of awards including four honorary degrees, the E.W.R. Steacie Memorial Fellowship awarded to the outstanding research scientist in 1969 and the Order of Canada. He and his wife Tara live in Toronto, Ontario.

KENNETH M. DYE
Auditor General of Canada

Kenneth M. Dye was born in Vancouver, British Columbia in 1936. He attended schools there and studied at the University of British Columbia. He completed his Chartered Accountancy requirements in 1962 and became a partner, four years later, in the accounting firm of Frederick Field, now Pannell, Kerr, Foster. During his association with Pannell, Kerr, Foster, Mr. Dye was involved in a variety of audit and accounting activities as well as in organizational analysis.

In 1971 he graduated from Simon Fraser University with a Master of Business Administration degree. Mr. Dye was honoured by the Institute of Chartered Accountants of British Columbia four years later, receiving the designation "Fellow" for distinguished service to the accounting profession. He was made a Fellow of the Institute of Chartered Accountants of Ontario in 1982 and a Fellow of l'Ordre des comptables agréés du Québec in 1984.

He is a Past President of the Institute of Chartered Accountants of British Columbia, past Governor of the Canadian Institute of Chartered Accountants, as well as a member of the Governing Board of the International Organization of Supreme Audit Institutions and a Governor of the Canadian Comprehensive Auditing Foundation. He is also Chairman of the Panel of External Auditors of the United Nations, the Specialized Agencies and the International Atomic Energy Agency. Mr. Dye has long been involved with various voluntary activities, particularly those associated with youth and church organizations. At present he is National Treasurer for Scouts Canada and Chairman of the Audit Committee of the Anglican Diocese of Ottawa.

Since assuming his appointment as Auditor General of Canada on April 1, 1981, Kenneth Dye has been at the forefront of developments in legislative auditing. He has been a leading proponent of stronger accountability for Crown Corporations and better financial reporting by governments.

Mr. Dye is married to the former Frances Marion Johnson of Vancouver. They have two daughters and a son. During his spare time he enjoys travel, skiing, hiking, camping, canoeing, curling and reading.

O CANADA

O Canada! Our home and
native land,

True patriot love in all thy
sons command.

With glowing hearts we see
thee rise,

The true north strong and
free!

From far and wide, O Canada,

We stand on guard for thee,

God keep our land glorious
and free!

O Canada we stand on guard
for thee,

O Canada! We stand on guard
for thee.
