

This is the University you have built. Since 1966, the city of Thunder Bay, the region of Northwestern Ontario, and indeed many groups and organizations from outside the area have contributed nearly \$3 million to the Capital Development Program of Lakehead University.

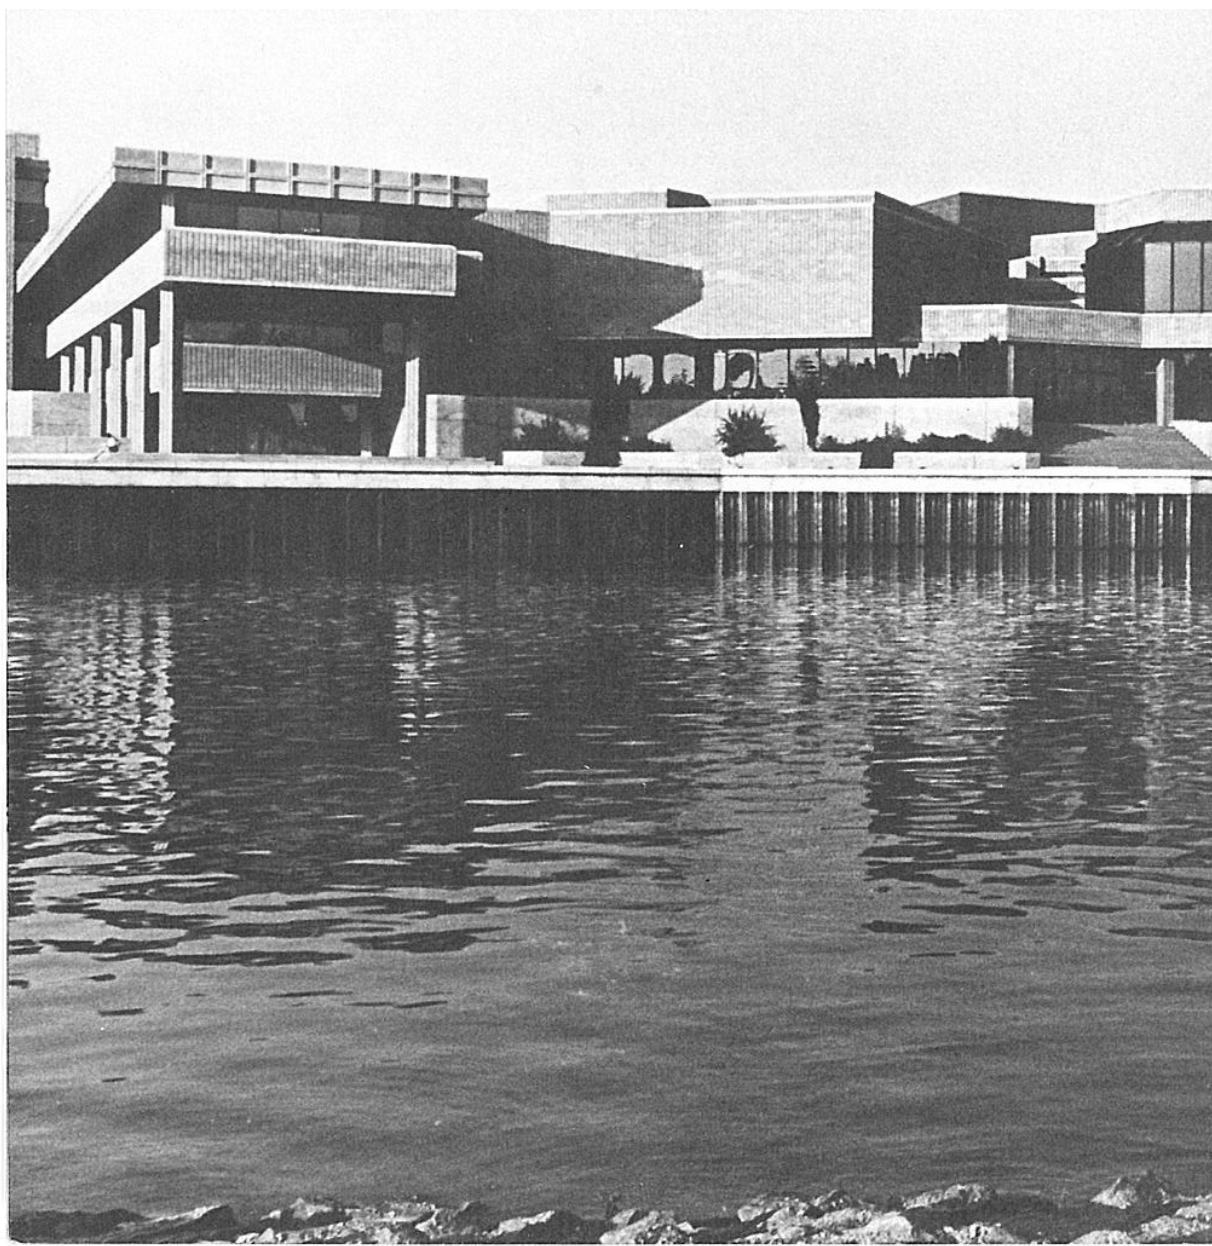

Such faith in the idea of Lakehead University has been rewarded by facilities worth \$35 million. It has also enabled over 2500 students to earn degrees and diplomas since the first class graduated in 1965.

It is my honour and happy duty to extend this token of appreciation, the magnitude of which could never be expressed.

Thank you,

A handwritten signature in black ink, appearing to read "D. H. Lambly". The signature is fluid and cursive, with a long horizontal stroke extending from the top of the first letter.

President.

Major Facilities at Lakehead University

1. Centennial Building 1969

Lakehead University's Centennial Building adds a major dimension to the University community. Officially opened in August, 1969, this science and technology complex houses extensive laboratory and research resources for experimentation and teaching in the pure and applied sciences at all levels from first year technology to graduate and research work.

2. University Centre Addition 1969

The original University Centre building now houses a 380-seat theatre, a new bookstore, student government offices, and various lounges, including the Great Hall and the Aesthetics Gallery. The new extension to the University Centre contains all cafeteria facilities, dining rooms and Faculty Lounge. Built in a crescent shape, most rooms offer a picturesque view overlooking the beautiful new lake. A barber shop, beauty salon, men's wear shop, variety store and bank, collectively known as "The Mall," are located adjacent to the Centre. And the Agora, a spacious, enclosed area connecting the University Centre and the Centennial Building, is a natural setting for dances, art exhibits, lectures and a central point for meeting.

3. Athletic Building 1967-71

The C. J. Sanders Athletic Fieldhouse has a sports surface of 120' x 110' — one of the largest in Canada — and a seating capacity of 1,400 with standing room for an additional 800. The addition of an olympic-size swimming pool, currently under construction, will provide year-round athletic facilities for the entire community.

4. Library 1967

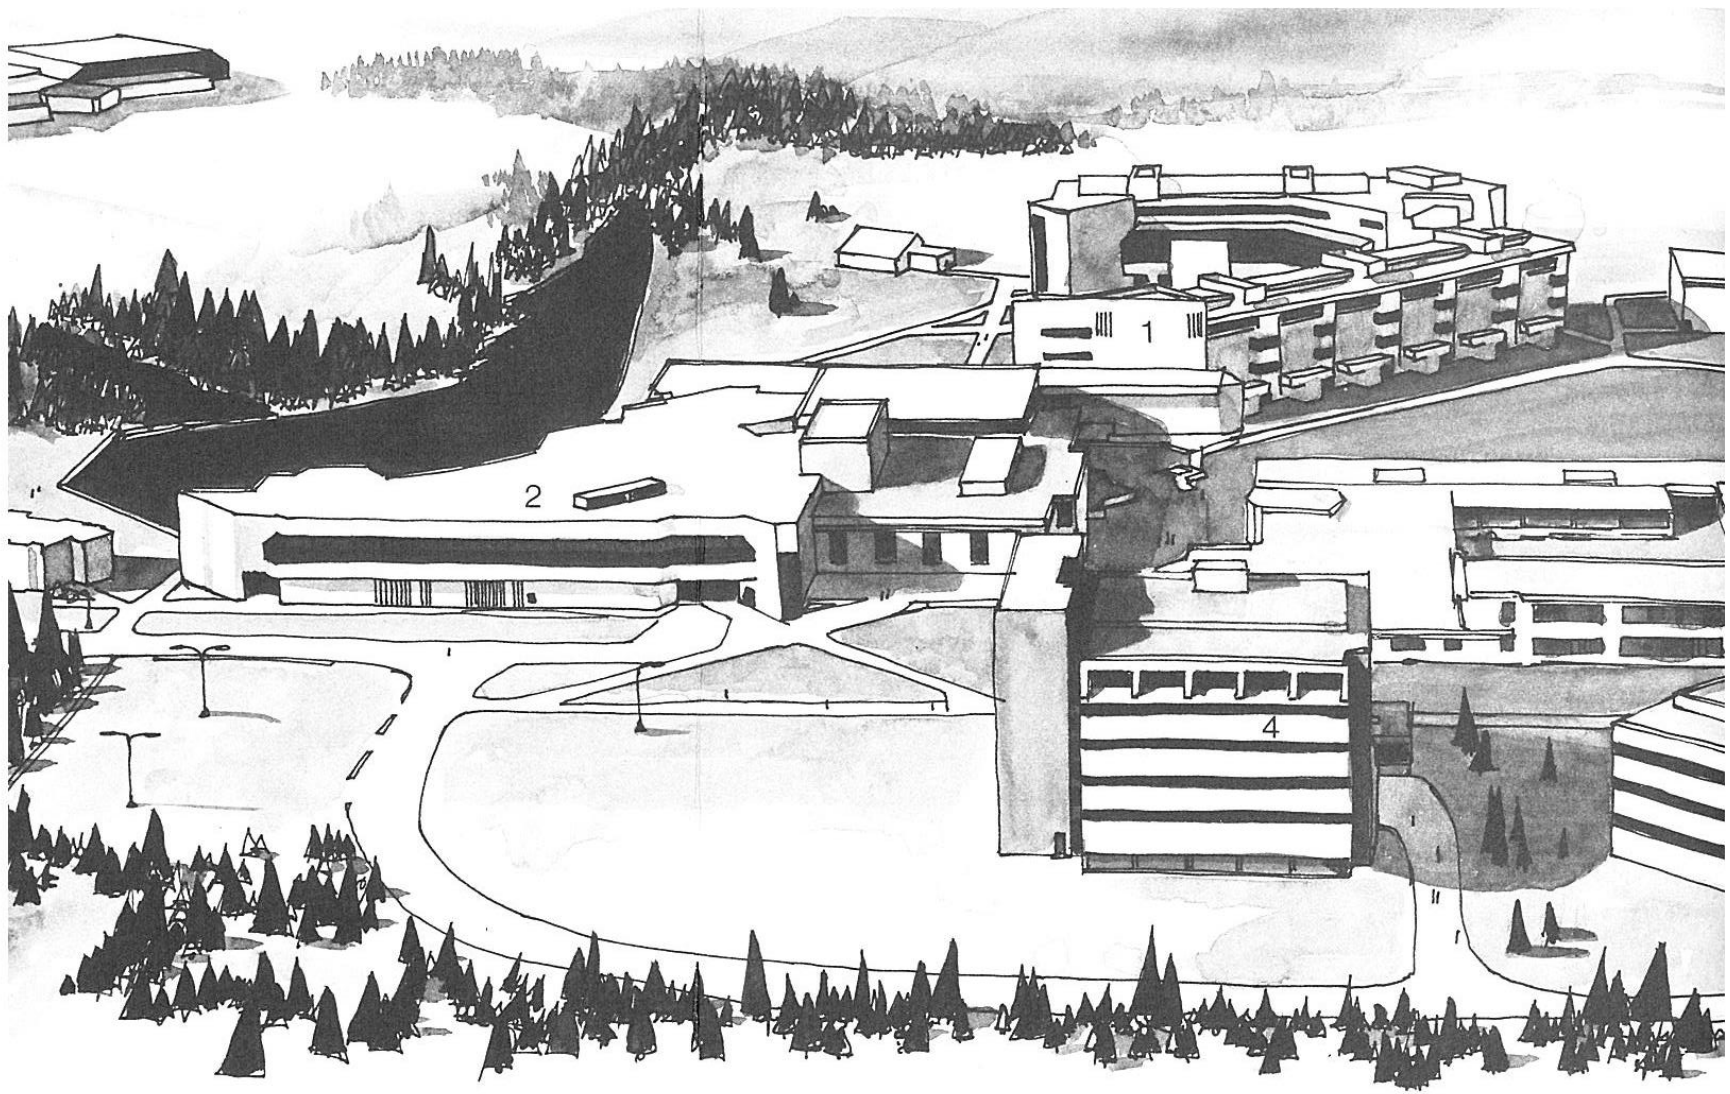

Although the Library primarily contains books and reference materials, some areas of the building still house faculty offices and classroom facilities. Part of the structure is occupied by the School of Library Technology. The building will eventually be concerned only with Library activity. It will seat about a thousand readers and house 500,000 volumes, in addition to providing a wide breadth of bound and microfilmed periodicals.

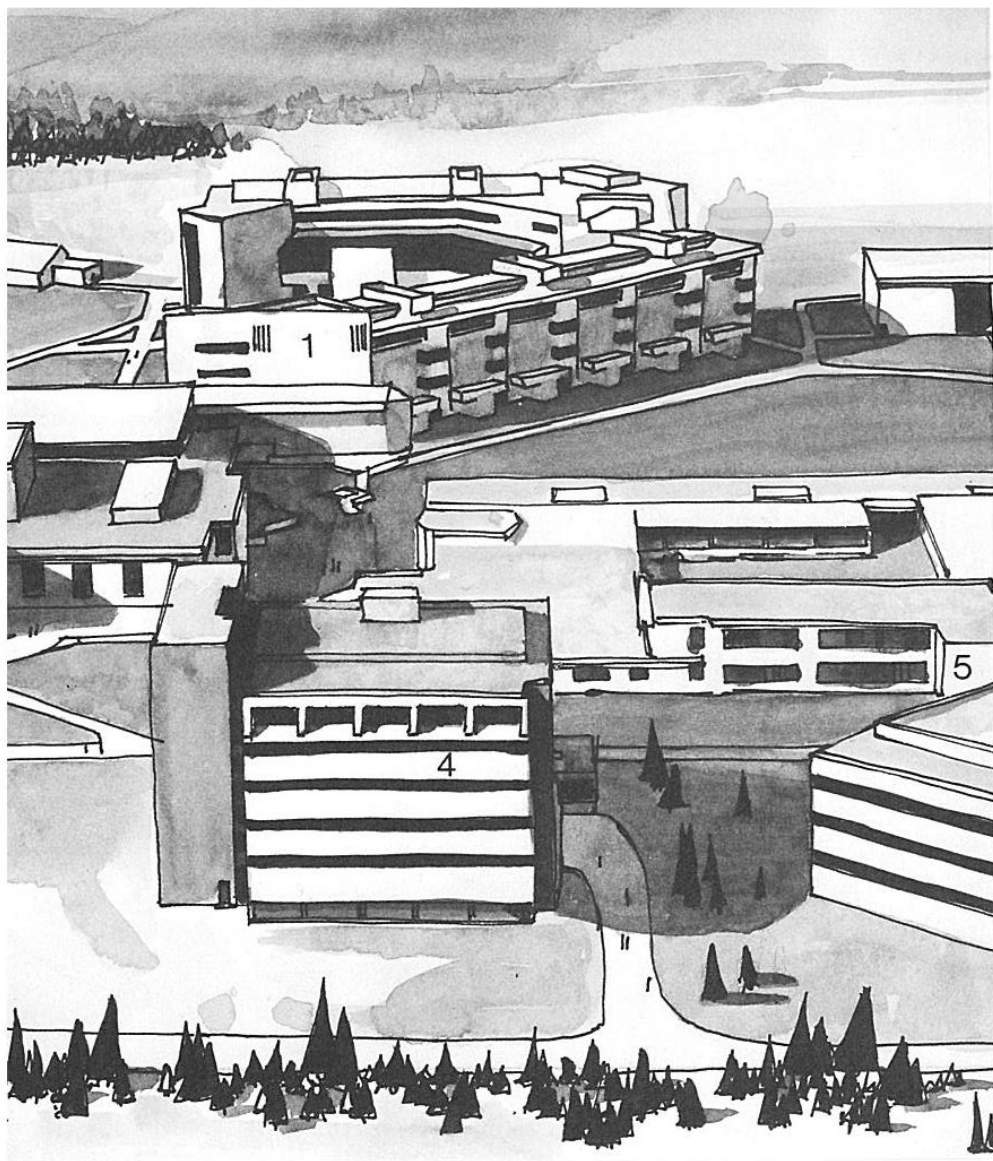

5. Computer Centre 1968

The Lakehead University Computer Centre houses a complex of computer equipment located in the southeast wing of the Main Building. Students, faculty and staff make use of equipment which reflects the latest advances in computer design. The new IBM System/360 50H computer offers good service and ample terminal time for all users. It is adaptable to teaching, research and administrative applications.

6. Residence Village 1970

The new Residence Village is situated on the banks of the McIntyre River within easy walking distance of all facilities. Each floor of the ten new three-storey Residence buildings includes six double rooms, four single rooms, and a spacious common room with kitchenette facilities, as well as separate laundry facilities. Two social centres and a large recreation room provide ample space for the active social lives of nearly six hundred students.

Report On Development Fund To June 30, 1971.

Receipts to Date	\$ 2.38 million
Balance Receivable	.52 million
Pledges Excused	.13 million
