Share OUR NORTHERN VISION

A UNIVERSITY IN THE NORTH
FOR THE NORTH

A V I S I O N F O U N D E D

Lakehead University was founded in June of 1946 as the Lakehead Technical Institute. On a beautiful Fall day in September, 1956, the cornerstone of the first building on the present Oliver Road site was laid. Almost a year later, 180 full- and part-time students made the long-awaited transfer from the Lakehead Technical Institute to the newly-named Lakehead College of Arts, Science and Technology.

As time passed, the College expanded in response to escalating enrolment and was empowered to confer university

degrees in arts and science. The first degrees were granted at an evening convocation in May, 1965.

The Lakehead University Act, 1965, was given Royal Assent by the Lieutenant Governor of Ontario on June 22, 1965, and came into force on July 1 of that year. The Lakehead College of Arts, Science and Technology was thereafter known as Lakehead University.

On May 26, 1969, an Order-in-Council of the Province of Ontario led to the union of the

Lakehead Teachers College and Lakehead University, the first amalgamation of a provincial teachers' college with a university in Ontario.

The role that the University plays in the Canadian post-secondary education system and its present respected stature did not just happen. It has taken decades of hard work and a combination of vision, faith and the financial support of countless individuals, corporations and foundations, who have all demonstrated a steadfast belief in the University.

Since the beginning, non-government financial support has been crucial to Lakehead's growth from a modest technical institute to an important regional resource. In 1963, Mr. Carl J. Sanders, a Toronto mining executive gave Lakehead University a very substantial gift. The imprints of change that have been made possible by the generosity of individuals like Mr. Sanders are visible in the legacy of buildings that have, in part, resulted from their caring and willingness to share in our vision.

Located in Thunder Bay, Lakehead University undertakes many innovative programs and research projects that have been designed to focus on and take advantage of the natural laboratories of Northwestern Ontario: forestry, geology, biology, geography and outdoor recreation, to name just a few. Local fieldwork complements

these regionally significant academic programs. Students enrolled in forestry or geology may spend many hours in the University's research forests or chipping at some of the oldest rock in the world on Canada's Precambrian Shield – all located in the immediate area and an integral part of their studies.

As a smaller University, our highly qualified professors are readily available to provide guidance and counselling on a one-to-one basis. This has fostered a warm and productive atmosphere that is not only conducive to learning and research, but also mirrors the philosophy of Lakehead: "Our University is committed to students and regionally-relevant study..."

The University has a mandate that is special in the Canadian university system. It strives in a pro-active way to participate in the development of North-western Ontario. With a unique blend of 31 traditional and professional programs at the undergraduate level and 14 post-graduate programs, we prepare our students well for their roles in regional, Canadian and global society.

OUR VISION FOR THE FUTURE

Dr. Robert G. Rosehart, President

Faculty and students make a University. Lakehead University is particularly proud of the quality and commitment of our over 250 full-time faculty members. At Lakehead, teaching and research go hand in hand. Our small average class size allows for real student-faculty interaction. At the same time, our faculty research projects have received both national and international acclaim and reinforce to our students the challenge of seeking out the new and unknown.

Because of our technical education roots, many of our programs touch students from all parts of Canada. Lakehead University has long been recognized as one of the most progressive Canadian

universities in providing opportunities for community college graduates to further their education to the undergraduate degree level. Noteworthy in this regard are our specialized access programs in engineering, forestry, business administration, nursing and social work.

Weekly, our professors travel hundreds of kilometers to teach in 16 regional centres an average distance of 350 km. from our Thunder Bay campus. Through our Centre for Northern Studies, the Centre for Entrepreneurship, and our Innovation Centre, we strive to assist the region's evolution. Special areas targeted by

Lakehead University for focus include Finnish Studies, the Special Needs population and Native Studies.

The Lakehead Board of Governors has plotted a course that will reflect a decade of planned expansion. Actions that will reinforce current traditional educational and research strengths and enhance our role as a catalyst for regional, social, cultural and economic development are ready for implementation on approval of funding. The results of our Partners Campaign, successfully completed in 1987, have provided the impetus and resources that were necessary to launch Phase I of

Lakehead's multi-year campus development plan. The Share Our Northern Vision Campaign will lead to Phase II of our plan and strategically position Lakehead University as one of the best small, comprehensive universities in Canada.

As each academic term brings with it new student hopes and aspirations, likewise, fresh challenges for the University to master in the areas of study and research are identified. At Lakehead, progressive change is a product of a shared vision to be treated as an opportunity that is met with enthusiasm and dedication.

C A M P A I G N C H A I R S

In 1990, Lakehead University celebrated its Silver Jubilee Anniversary – 25 years of achievement in education and research.

As National Chair for the \$19.2 million Share Our Northern Vision Campaign, I am asking you to make an investment in the future that will enable Lakehead to meet the evolving educational needs of a new generation.

The challenges that Canadian universities are facing in the '90s will not be easily solved. Additional programming, expanded facilities and new equipment are costly but necessary requirements that the University cannot fund from government grants and student tuition fees alone.

Identifying alternate funding is crucial to the realization of Lakehead's vision of enhanced academic and research strengths and the growth of educational opportunities for students.

William James
National Campaign Chair

In soliciting support from the private sector, alumni, and friends, I believe these important goals can be reached.

A gift to Lakehead University is a personal way of endorsing the ideals of an institution that is dedicated to providing quality education today and playing a leadership role in the events of the future.

Since its founding in 1965, Lakehead University has made a significant and lasting contribution to the economic and cultural growth of Canada and more specifically within the City and region it serves.

Today, the University is recognized as a leader in the delivery of high-quality, innovative academic and research programming. As we

prepare for the 21st century, the next decade will be crucial to the continued development of university education in Northern Ontario.

To maintain Lakehead University's ability to provide leadership and to ensure a bright future for our student body, the Board of Governors has initiated the Share Our Northern Vision Campaign, a major five-year fund-raising undertaking.

With your assistance, Lakehead will enhance identified strengths and give required support for much-needed new programming, buildings, student scholarships and equipment that will enable the University to meet the challenges of tomorrow.

It is within this context that I seek your commitment to a shared vision. Every gift, regardless of size, will be greatly appreciated and acknowledged. Let's build together.

Robert J. Paterson

THE CHALLENGE OF TOMORROW

I N C O M E

Source of Funds

University Family (Board of Governors, Faculty & Staff, Alumni)	\$1,200,000
Student Referendum	2,900,000
Parents	100,000
Bequests, Endowments & Special Names	1,000,000
Foundations	1,200,000
Municipal and Regional Government	750,000
Private/Corporate Sector	4,200,000
Provincial Government	7,850,000
	\$19,200,000

E X P E N D I T U R E S

Use of Funds

Bora Laskin Building	\$6,000,000
C.J. Sanders Building (Fieldhouse)	3,000,000
Chancellor Paterson Library	3,000,000
Student Centre	3,300,000
Build-a-Room Residence	500,000
Handicap Access	400,000
Scholarships	1,000,000
Equipment	1,000,000
New Initiatives	1,000,000
	\$19,200,000

B O R A L A S K I N B U I L D I N G

SCHOOL OF EDUCATION

\$6,000,000

Lakehead University's School of Education is a prime educational centre for a large part of the Province of Ontario and must continue to attract top scholars to the growing specialized fields of education.

Construction of an addition to the Bora Laskin Building as well as extensive renovations to the current facility are essential in adapting to change in leadership roles in the educational community.

The Bora Laskin building addition and renovations mean not only increased enrolments but also that our "teachers of the future" and educators in the region will have access to facilities such as:

- a Curriculum Resource Centre with sophisticated testing and diagnostic facilities
- a Centre for Native Language Instruction
- a Centre for Early Childhood Education Studies
- an Educational Media Technology and Computer Complex
- a Special Education Resource Centre
- special purpose classrooms

T H E C H A N C E L L O R P A T E R S O N L I B R A R Y

\$3,000,000

A quality library is the core of a good university. Well-chosen library holdings support teaching and research and attract excellent students.

Over the 25 years since the opening of The Chancellor Paterson Library, collections have grown from 60,000 to 700,000 volumes. Student enrolment has tripled during this time, placing additional strain on facilities.

By the year 2000, the collection size is expected to reach 850,000 volumes.

A recently commissioned consultant's study has detailed the major renovations to the Library needed to handle this growth. At the same time the report points out the need for new wiring and equipment to provide access to the increasing volume of information coming out in electronic formats.

Our wish is to ensure a facility that will allow the continued provision of quality library service to the University community.

C. J. SANDERS FIELDHOUSE

PHYSICAL EDUCATION AND ATHLETICS

\$3,000,000

Built in 1970, the C.J. Sanders Fieldhouse accommodated a modest enrolment in the School of Physical Education which has expanded significantly. Critical space shortages are taxing the shared use of this facility by Athletics and Physical Education and requirements for additional classrooms, laboratories, office and gymnasium space are acute.

Hundreds of daily users of the C. J. Sanders Fieldhouse demonstrate student, faculty, staff and community participation in this facility.

Physical Education in the 1990s is becoming increasingly scientific. In order to further research in sports medicine and sports science, major equipment purchases are an ongoing requirement.

The following is needed to update the C.J. Sanders Fieldhouse:

- Physiology Laboratory
- Biomechanics Laboratory
- Motor/Psych Laboratory
- Biochemistry Research Laboratory
- Classrooms
- Graduate Student Area
- Improved Handicap Access
- New Multi-Purpose Facility

STUDENT CENTRE

\$3,300,000

Lakehead University students are contributing \$2.9 million toward the construction of their new Student Centre scheduled to open September 1991.

Phase II of the project involves extensive renovation to existing student space.

An attractive interior physical environment is an important factor in feeling harmony and comfort. Lakehead University is striving to provide its students with an aesthetic climate in which to flourish.

S C H O L A R S H I P S

\$1,000,000

The future of our country depends upon well-educated citizens. Lakehead University because of its unique geographical location must compete very keenly to attract local, regional, national and international students with the greatest potential.

The need for increased endowed undergraduate and graduate level scholarships is crucial for our university to remain competitive in the academic marketplace.

E Q U I P M E N T

\$1,000,000

Within the 25-year history of Lakehead University, teaching and research have been predicated, in part, upon excellent facilities and up-to-date equipment.

As equipment becomes obsolete, we must keep pace with current technology by providing adequate replacements.

With shortages of scientists and engineers predicted, Lakehead University must strive to maintain high equipment standards for progressive teaching as well as balance and diversity in research.

NEW INITIATIVES

\$1,000,000

Lakehead University's uniqueness as a post-secondary institution is reflected in the population it serves – residents of local, regional, national and international communities with an emphasis on Ontario's north. Lakehead University has main-

tained its excellent reputation in its provision of additional programs including the Centre for Entrepreneurship, Centre for Northern Studies, Centres of Excellence, Innovation North, and the continuance of the Contact North network. Though wanting to retain its relatively small size and informal environment, Lakehead University must

continue to move towards development of new programs critical in keeping our institution at the forefront of academic learning.

Lakehead University's northern vision forecasts new initiatives including expansion of graduate and undergraduate programs in the area of Engineering, Business,

Social Work, and Northern and Environmental Studies.

Elevated levels of funding are a necessity in providing important key elements that comprise a high quality education and service to our students.

These initiatives will serve as part of our larger effort to ensure the continuing pre-eminence of Lakehead University.

FELLOWSHIP RESIDENCE

\$500,000

The University plans to construct a 50-bed Fellowship Residence. Lakehead currently leads all Ontario universities with the largest percentage increase in applications from high school students.

The Residence will reflect the multicultural diversity of our University as well as human fellowship.

The Fellowship Residence offers itself to a "Build-a-Room" initiative where each sponsored room will have a permanent plaque on the wall to acknowledge the donor. Support units are \$10,000 per resident room.

HANDICAP ACCESS

\$400,000

Lakehead University's requirement to improve handicap accessibility include the installation of elevators in the University Centre Building and Cornwall Campus.

U N I V E R S I T Y F A M I L Y

Lakehead University's family, over its history, has contributed not only to the intellectual, social and political climate of our University, but also to its financial well-being. Gifts of significant dollars from Alumni, Board members, Faculty and

Staff have meant that Lakehead University can provide additional scholarships and bursaries, purchase library books and periodicals, assist in supporting vital campus research and special projects, thereby improving the quality of education to its students.

Over the next five years of the Share Our Northern Vision Campaign, Lakehead University anticipates a benefaction of \$1.2 million from the University family. By helping ourselves, we intend to foster growth and excellence at Lakehead University.

We recognize the benefits that will result from the Share Our Northern Vision Campaign and have endorsed this fund-raising effort in the most positive way possible – through our personal commitment as volunteers and contributors.

C A M P A I G N A D M I N I S T R A T I O N

The Share Our Northern Vision Campaign is coordinated by the Lakehead University Development Office with the co-operation of the Faculty, Staff, Students, Alumni and Friends of the University.

The Development Staff will be the resource and support service to the Campaign. The Development Office is the mandated fund-raising body for the University with Registered Charitable Number: 0052217-20-20.
