CAMPUS SITE PROJECTS - SUMMER, 1972

SITE SERVICE PROJECTS

Claude Smith, Chief of Physical Planning and Construction for the University, regrets to inform the University Community that fairly extensive disruptions of campus parking, as well as of vehicle and pedestrian traffic, will prevail throughout the summer months. Students, faculty and staff of the University are cautioned to drive with extreme care on campus during the summer period because detours will be the order of the day.

Following is a numbered list of the various projects, some of which are already underway. The numbers are reproduced on the accompanying map of the campus in order to give you some idea of the main areas of activity.

1. The road from the Oliver Road entrance, around the Academic Building and past the Library to Parking Lot #1, is currently undergoing preparation to be curbed and paved. Parking Lot #1 will also be reconstructed with steel posts replacing the present wooden ones. The area around the Academic Building is scheduled to be landscaped before September.

2. The area around the C. J. Sanders Athletic Com-

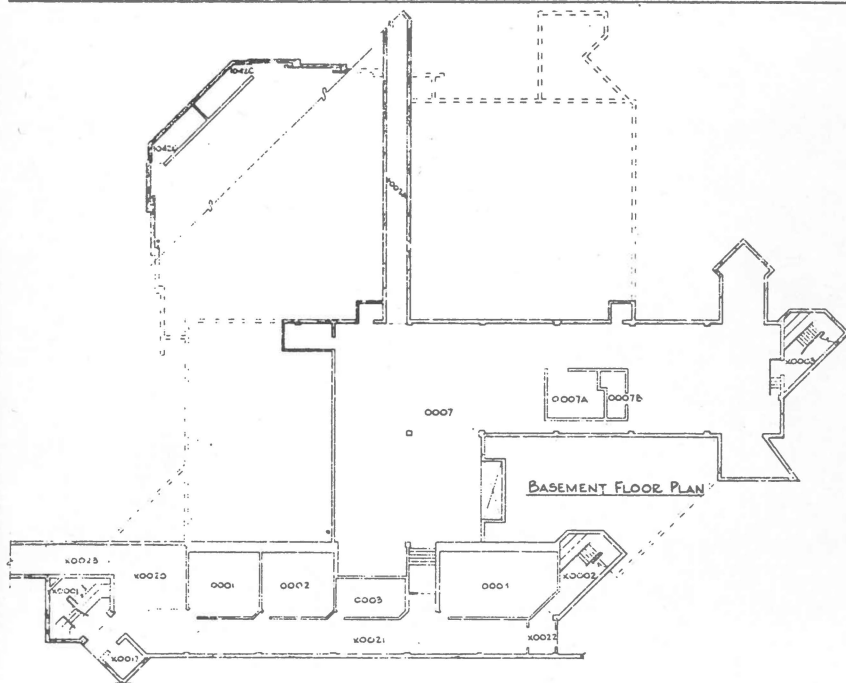

plex will be revamped during and after construction of the new olympic-size swimming pool. The parking lot will be shifted, but its present capacity will be retained; a new exit road will be introduced between the swimming pool and Oliver road, thus completing loop service around the Athletic Complex; the roads will be paved; the area will be landscaped, with new walkways introduced.

3. New construction around the Faculty of Education Building will include a new walkway connecting the campus to Oliver Road on the habitual path of pedestrians, and also a section of pavement connecting the front and rear parking lots. Considerable landscaping will also take place around the Faculty of Education Building.

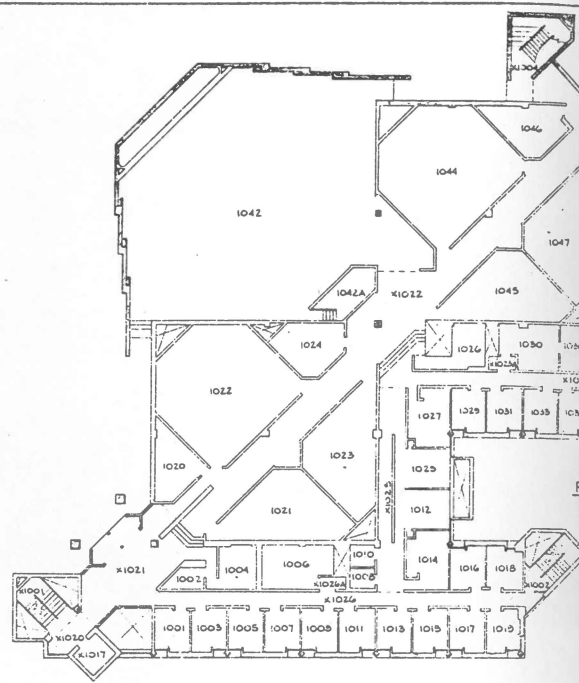

4. The natural walk between the dam and the floodgates on the island in the centre of the campus will be paved.

5. The roadway on the Oliver Road side of the Power Plant has been removed to make way for cooling towers which have already been installed. Landscaping is currently underway in this area.

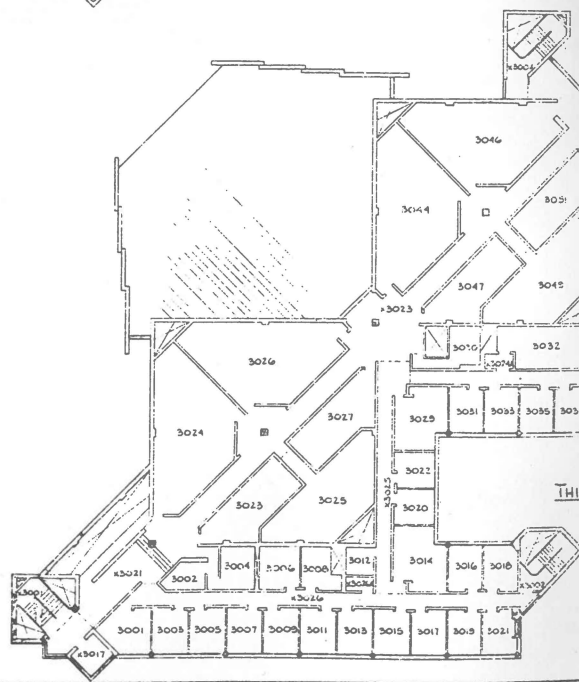

6. Exterior lighting will be installed over the entire Campus site during the summer months.

BASMENT FLOOR PLAN

SECOND FLOOR PLAN

ACADEMIC BUILDING

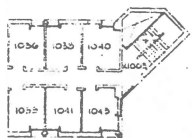

ACADEMIC BUILDING

The Department of Physical Planning and Construction announces that the new Academic Building adjacent to the Library will be fully furnished and ready for occupancy well in advance of the opening of classes for the regular session beginning in September, 1972.

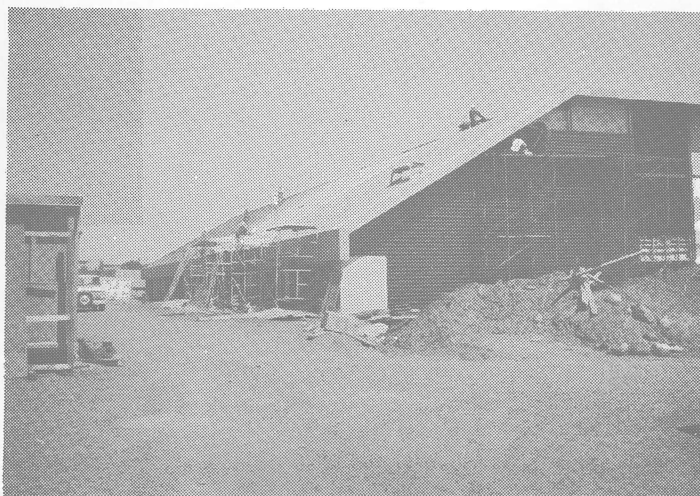

A glance at the accompanying floor plan reveals at least six different types and sizes of classroom. Rooms similar in construction to 1021 and 2025 are 40-station lecture rooms with tablet-arm seating; those similar to 2024 are 60-station lecture rooms with tablet-arm seating. Rooms 1022 and 1044 are carpeted, horse-shoe-shaped, tiered case study rooms. Rooms similar to 1020 are 12-station seminar rooms with carpeted floors and table-and-chair seating; those similar to 2023 are 16-station seminar rooms. Room 2047 is an 80-station examination room with desk-and-chair seating to make it a flexible testing area.

The smaller rooms are faculty offices, numbering 82 in all. Also, centrally located in each of the three administrative areas are two double-occupancy secretarial offices.

Finally, the largest area on the first floor, designated number 1042, is a lecture theatre-auditorium which boasts 356 auditorium-style upholstered seats with articulating tablet-arms for note-taking.

FLOOR PLAN

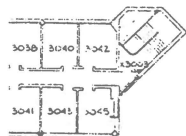

Swimming Pool Nearing Completion

ATHLETIC COMPLEX

Construction on Phase 11 of the Athletic complex is under a full head of steam. Except for a few finishing touches, this entire phase should be completed for the beginning of the fall session in September.

Separate segments of this construction include three new lecture rooms, three squash courts, a combatives room specifically designed and equipped for the University's expanding wrestling program, and an auxiliary gymnasium for creative dance, gymnastics, etc.

The major project is the olympic-size swimming pool. It will measure 50 metres in length, and will be six lanes wide; it will be 12 feet deep at one end, and 3 feet 6 inches at the other; it will have portable bulkheads to divide the pool into separate instruction areas. The pool will include two 3 metre diving boards and two 1 metre diving boards. And seating capacity will be approximately 500.

CAPITAL PROJECTS

Editor's Note: Following are further excerpts from President Tamblin's Annual Report to the Board of Governors:

Over the years, the University has attempted to keep pace with developments in academic programs, enrolment, and research activities, by providing additional physical facilities as required. Although the Board is familiar with the details of the University's present Capital Program, I would like to briefly summarize the major components of that program at this time. Construction is approaching completion of the 40,000 square foot Academic building, with an estimated total cost of \$2.5 million, and on Phase II of the extension to the Athletic complex, with an approved budget of \$1.8 million. This new Academic building should provide sufficient teaching and office space to serve the University's requirements for the next few years, while the extension to our Athletic facilities, including the addition of an olympic-size swimming pool, will accommodate the needs of our own Physical and Health Education and Athletic programs, and also provide ample opportunity for use by Confederation College and members of the general community. The remaining projects being funded by the Provincial Government include Site services, Utilities extension, Power House equipment, and some alterations to existing structures. The original budgets for these projects totalled \$3.9 million, of which \$1.5 million remains to complete them.

There are also five minor projects which are being funded out of the University's own funds. These include minor alterations of the Faculty of Education and the Main Buildings, renovations and equipment purchase for the newly-expanded Forestry and Engineering Programs, Utility Metering and the purchase of a Residence for the University President. The total cost for these five projects are estimated to be \$230,000.

Second Language Awards

The student awards Branch of the Ministry of Colleges and Universities has announced the introduction of a new Fellowship for Second Language Study, and a travel bursary for French-speaking students. These awards are funded by the Federal Government and administered provincially.

The aim of the fellowship is to provide students with an opportunity for immersion in the milieu of their second language in any discipline. It is open to Ontario residents who are undergraduate or graduate students registered in Canadian universities. Approximately 100 fellowships will be awarded, to maximum amount of \$2,000.

The purpose of the travel bursary is to help French-

meetings

Language Awards (Cont'd)

speaking students, who cannot pursue university studies in French in Ontario, to study in their own language in Quebec. The amount of the bursary will not exceed the equivalent of two economy round trips annually from the student's place of residence to the university chosen.

Deadline date for the fellowship is October 31, 1972, and for the travel bursary is December 31, 1972. Both awards are available for the 1972-73 academic year.

Application forms and further information may be obtained from Mr. D. S. Bethune, Director of Student Awards, Ministry of Colleges and Universities, 8th floor, Mowat Block, Queen's Park, Toronto (telephone 965-5241).

OH, HAPPY DAY!

In response to popular demand, "Happy Hours" will be revived, beginning Friday, July 7 at 4:00 p.m. in the Faculty Lounge. All University faculty and staff are invited to take advantage of this most congenial way to beat the summer heat.
