OUR NORTHERN VISION

LAKEHEAD
UNIVERSITY

A UNIVERSITY IN THE NORTH FOR THE NORTH

Robert G. Rosehart, President

The role that Lakehead University plays in the Canadian post-secondary education system and its present respected stature did not just happen. It has taken decades of hard work and a combination of vision, faith and the financial support of countless individuals, corporations and foundations, who have all demonstrated a steadfast belief in the University. 1990 marked the 25th Silver Jubilee Anniversary celebration of Lakehead's achievement in education and research. The imprints of change that have been made possible by the generosity of many individuals are visible in the legacy of buildings that have, in part, resulted from their caring and willingness to share in our vision.

Located in Thunder Bay, Lakehead University undertakes many innovative programs and research projects that have been designed to take advantage of the natural laboratories of Northwestern Ontario: forestry, geology, biology, geography and outdoor recreation, to name a few. As a smaller University, our highly qualified professors are readily available to provide guidance and counselling on a one-to-one basis. This has fostered a warm and productive atmosphere that is conducive to learning and research.

Because of our technical education roots, many of our programs touch students from all parts of Canada. Lakehead University has long been recognized as one of the most progressive Canadian universities in providing opportunities for community college graduates to further their education to the undergraduate degree level. We have specialized access programs in engineering, forestry, business administration, nursing and social work in this regard.

The University has a special mandate which strives in a proactive way to participate in the development of Northwestern Ontario. Weekly our professors travel hundreds of kilometres to teach in 16 regional centres. Through our Centre for Northern Studies, The Centre for Entrepreneurship and our Innovation Centre, we strive to assist in the region's evolution.

Lakehead University is embarking upon its *Share Our Northern Vision Campaign* which will see a plotted course reflecting a decade of planned expansion. Lakehead University is one of the best mid-sized comprehensive universities in Canada.

At Lakehead University, progressive change is a product of a shared vision.

THE CHALLENGE OF TOMORROW

INCOME

Source of Funds	
University Family (Board of Governors, Faculty & Staff, Alumni)	\$1,200,000
Student Referendum	2,900,000
Parents	100,000
Bequests, Endowments & Special Names	1,000,000
Foundations	1,200,000
Municipal and Regional Government	750,000
Private/Corporate Sector	4,200,000
Provincial Government	7,850,000
	<hr/> 19,200,000

CAMPAIGN LEADERSHIP

The challenges that Canadian universities are facing in the 90's will not be easily solved. Additional programs, expanded facilities and new equipment are costly but are essential requirements that the University cannot fund from government grants and student fees alone.

In soliciting support from the private sector, alumni and friends, we believe these important goals can be reached.

A gift to Lakehead is a personal way of endorsing the ideals of an institution dedicated to providing quality education today and playing a leadership role in the events of the future.

As Campaign Chairs for the \$19.2 million *Share Our Northern Vision Campaign*, we are asking you to make an investment in the future that will enable Lakehead to meet the evolving educational needs of a new generation. Every gift, regardless of size, will help us build together!

William James
National Campaign Chair

Robert J. Paterson
Chair, Board of Governors

CAMPAIGN PRIORITIES

Bora Laskin Building: School of Education \$6 Million

Lakehead University's School of Education is a prime educational centre for a large part of the Province of Ontario and must continue to attract top scholars to the growing specialized fields of education. Construction of an addition to the Bora Laskin Building as well as extensive renovations to the current facility will result in more sophisticated testing and diagnostic apparatus, a Centre for Native Language, a Media Technology and Computer Complex, a Centre for Early Childhood Education Studies and a Special Education Resources Centre.

Chancellor Paterson Library: \$3 Million

A quality library is the core of a good university. Well-chosen library holdings support teaching and research and attract excellent students.

Over the 25 years our Chancellor Paterson Library has grown from 60,000 to 700,000 volumes. By the year 2,000 the collection size is expected to reach 850,000. Major renovations and new equipment will allow for easier access to the increasing volume of information coming out in electronic format.

- New Initiatives _____

Special instructions concerning my gift

\$ _____ Total pledge
 \$ _____ Paid herewith
 \$ _____ Balance, to be paid

Monthly _____
 Quarterly _____
 Semi-annually _____
 Annually _____

Over a period of _____ years,
 beginning _____, 199_____, or as
 follows: _____

Signature: _____

Date: _____

C.J. Sanders Fieldhouse: Physical Education and Athletics \$3 Million

Physical Education in the 1990's is becoming increasingly scientific. In order to further research in sports medicine and sports science, major equipment purchases are an ongoing requirement. Lakehead requires physiology, biomechanics, motor/psych and biochemistry research laboratories as well as a new multi-purpose facility.

Student Centre: \$3.3 Million

Lakehead University students are contributing \$2.9 million toward the construction of the new Student Centre scheduled to open September 1991. Phase II involves extensive renovations to existing student space. An attractive interior physical environment is an important factor in feeling harmony and comfort. Lakehead University is striving to provide its students with an aesthetic climate in which to flourish.

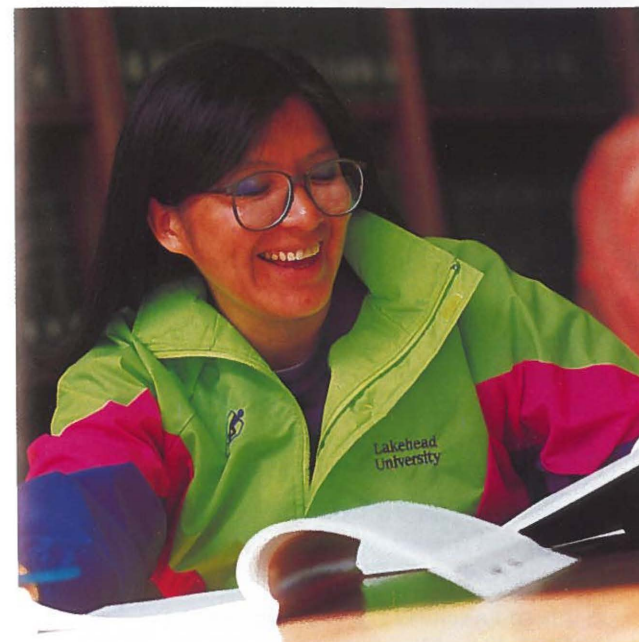

Equipment: \$1 Million

Within the 25-year history of Lakehead University, teaching and research have been predicated, in part, upon excellent facilities and up-to-date equipment.

Equipment replacement will allow us to keep pace with current technology and the potential scope of research and teaching styles it can provide.

Scholarships: \$1 Million

The need for increased endowed undergraduate and graduate level scholarships is crucial for our university to remain competitive in the academic marketplace. Bursaries enable deserving students the opportunity to pursue a post-secondary education regardless of their financial resources.

"The Faculty is dedicated and personable. I'm attracted to Lakehead because of its small size and lower faculty/teacher ratios and research opportunities."
