

Dec. 4, 1970

Volume 3, No. 12

Arctic Is Speaker's Topic

The second speaker in the Public Lecture Series "The Unstable Environment", Dr. Robert Curry, will be here on Thursday, December 10th, as guest of the Special Events Committee.

Dr. Curry, of the University of Montana, Missoula, will be giving a talk entitled "Climatic implications of Arctic oil development on the residents of northern North America" at 7:30 p.m. in the University Centre Theatre, and there will be a question period and informal coffee reception following.

As an "environmental geologist", Dr. Curry has a varied background and range of interests. He obtained his Ph.D. from Berkeley, California, in Geomorphology, an M.S. in Plant Ecology from Colorado. He has taught geology at the University of Alaska, geography at the University of California, Santa Barbara, and is now at Montana beginning an environmental studies graduate program.

Dr. Curry's geographic and geologic background and his personal energy have resulted in his involvement with many aspects of environmental problems. He is environmental advisor to the U.S. Senate; to the U.S. Department of the Interior and to several environmental law groups. He is currently advising on problems of ocean waste disposal, a national fuels policy, the nationalization of railroads for solid waste haulage, the oil spill potential in the Arctic, the Alaskan pipeline, various American forest practices and oil development in the Santa Barbara channel. He is also a strong advocate of the recycling of paper, and overstamps his mail with the message 'Pulp Mills are Destroying our Environment', a note of significance for those considering the economic development of our own area of North America.

His current research is in the field of climatic change, especially the recent trends which have strong implications on the future in terms of minor changes, both natural and Man engendered, which could have very violent effects on national economies. His talk will reflect a combination of his varied interests and should give exposure to one aspect of environmental instability that is largely unrecognized in the present outcry against more visible pollution and ecological destruction.

It is hoped that Dr. Curry's arrival from Montana will be in time for his informal participation in a discussion of climatic change with students and faculty of the geography, geology, biology and forestry departments.

All who have an interest in the present and future of mid-Canada and the North are welcome to this public lecture.

Lakehead Film Society

Memberships in the Lakehead Film Society are now available for the 1971 Season. Ten distinguished films representing the work of an international group of directors have been selected for this season's programs, including Magnificent Ambersons, 11 Grido, Open City, Elvira Madigan, The Informer, Stagecoach, Fires on the Plain, Forces of Evil, 24 Hours in a Woman's Life, and New Cinema, a collection of International short films. Films will be screened in the newly renovated small auditorium of the Fort William Collegiate beginning at 8 p.m. in the evening. Admittance will be by series membership only. Further information and Memberships are available for \$10.00 and are available from the Match Box in the University Mall, or by calling 577-5176.

Psychology Hosts NRC Guests

Dr. D. Belanger, Dean of Faculty of Philosophy, University of Montreal and Dr. A. B. Kristofferson, Professor of Psychology, McMaster University members of the National Research Council of Canada, Psychology Grants Selection Committee, visited the Department of Psychology on November 20, 1970. The visit was organized by Dr. K. Paul Satinder. The NRC members spent their day visiting the Psychology laboratories and talking to the faculty members of the Department of Psychology. A luncheon meeting was attended by Psychology Faculty members and Dean Ryan.

Both members were impressed by the various aspects of the department. At one point Dr. Belanger, who was Chairman of the Psychology Department, University of Montreal before he became Dean of the Faculty, remarked that this was the first animal laboratory he has seen which is so well kept. At the conclusion of the visit both of the visitors remarked that they were surprised with the rate of the development of the Department of Psychology during the last two years. They further remarked that this was one of their most fruitful days they have spent and commented the visit was well organized and hopefully will be very fruitful both to the Department of Psychology and Psychology Grant Selection Committee of the National Research Council of Canada.

Merry Christmas In A New Way

The Lakehead University Christmas Cards, now available from the University Bookstore are a unique and exciting representation of the spirit of LU. These cards are not only a beautiful conveyance of greetings for the holiday season, but bring to the recipient an opportunity to use the card in a number of interesting ways. The card arrives in a light blue envelope, following the trend to the use of coloured stationery, the size and shape of which immediately proclaims the 'difference' of this Christmas Greeting. From the overall card which provides room for the senders message, the recipient is invited to punch out the central area, which folds and fastens easily to become an extremely attractive tree ornament, table or desk decoration, or a gift box for small articles. The unusual presentation of this greeting stirs the imagination of the receivers and involves them in both assembly and display of the card, and conveys the creative involvement which is basic to the University spirit.

Designed by Graphic Designer, Mrs. Helen Keller of the Media Services Department, the Lakehead University Christmas Card has been in production for approximately a month and a half. Many special considerations were involved in both the design and the production of the card in order to ensure the success of the intention to provide a Christmas Card that was as much a pleasure to send as to receive. Special consideration was given to the weight of the cardboard used with respect to mailing cost and durability. Lehto Printers worked closely with the Graphic Design area to provide the step-by-step professional involvement necessary in total production to achieve such high quality. The design of the card includes one area of suitable greeting, one with the University's name, and four areas with actual representations of crystal patterns of snowflakes, researched by the Library staff in the interests of both beauty and realism. The photographs of the snowflake designs had to be treated with utmost care in order to assure a truly distinctive representation.

The costs of these cards are extremely low as University staff was involved at so many levels of conception and design, and represents only the actual costs of production. The cards are now on sale in the Bookstore for just \$1.25 for 12 cards. Students and staff are urged to drop in and see these exceptional cards and to consider their use for extending Christmas greetings to friends and acquaintances. Mrs. Keller has assured us that, in the research of this particular design, she has come upon others with interesting possibilities, and that these will be developed for future years if the sale of this year's cards prove that a sufficient interest exists.

L. U. Review

The Lakehead University Review which, in its first issue this spring displayed a new format and promised a special emphasis on Central Canada Studies, fulfills that promise in its latest edition. Volume 111, No. 2 contains two articles which are concerned with the Mid-Canada Development Foundation. Ivor G. Davies of the Geography Department examines critically "Essays on Mid-Canada", a collection of the papers presented at the first session of the Mid-Canada Development Conference, held at Lakehead University in the summer of 1969. "The Global Living System and Mid-Canada" is the Report of the Task Force Committee on Ecological and Environmental Factors of the Mid-Canada Development Foundation. Members of that committee included Kenneth Dawson of the Department of Sociology/Anthropology and Donald A. Chant, the recent speaker in our public lecture series. A third article, an analysis of the NDP victory in the 1969 Manitoba election is written by Tom Peterson and Paul Barber of the University of Manitoba. John Hilliker of the History Department contributes a review article - "Reassessments of Curzon" and there are a number of excellent book reviews.

The Lakehead University Review is now available in the Bookstore (\$1.75), or on subscription by application to Leona George, Office Services Manager. (\$3.50 per annum)

Holiday Break

With holidays so close at hand, the next issue of LU WEEK will be the last issue until January 8, 1971. At that time, we hope to hit the stands with a brand new and expanded format in order that we may do justice to our contributors and their information, as well as reinstate photographic material that is of interest.

You are reminded that information regarding any events taking place before January 8th that you would like to have publicized in LU WEEK should be communicated to the Information Office by NOON, WEDNESDAY, DECEMBER 9th. Your cooperation is appreciated.

Campus Notes

□Mr. D. D. Sudar, Chairman, School of Library Technology has been invited to address The Library Association of Ottawa on Tuesday, December 15th. The theme of the address will be CURRENT CHANGES IN LIBRARY EDUCATION.

Mr. Sudar will elaborate on the Four Year Undergraduate Programme in Library Technology which is planned to be offered at Lakehead University, and if approved, would be the first of its kind in Canada. Mr. Sudar will use this opportunity to announce the planned Programme officially to the profession.

□CHRISTMAS EXAM NOTICE - ALL STUDENTS ARE REMINDED TO BRING THEIR PHOTO IDENTIFICATION WITH THEM TO THEIR EXAMINATIONS.

Students requiring a Photo I.D. must present their Photo I.D. Permit or Photo I.D. Authorization Sheet to the I.D. Centre. The Centre, located in residence, is open Mondays and Wednesdays from 10:00 a.m. to 1:00 p.m.

□The Aesthetics Gallery is now presenting a photographic exhibition from the National Film Board of Canada entitled "A Time to Dream". The exhibit featuring various representations of the Canadian scene, includes landscapes, nature, art and life subject matter which reflects a mood of Canadiana. These excellent photographs have been selected from the collections of well known photographers from across the land. The exhibit is on display in the Great Hall and smaller upstairs Gallery daily from 8:00 a.m. to 10:00 p.m. and will be open on weekends from 12:00 noon to 6:00 p.m. Closing date for the exhibition is December 15th.

□"IMPULSE", containing some of the literary work of the 1969/70 Lakehead University students is now available at no cost from the upstairs Gallery as long as copies last. Edited by the Aesthetics in order to provide a unique means of communication, IMPULSE is an AMS sponsored and financed student literary outlet. You are invited to pick up your copy now.

□Starting Friday, December 4th, at 8 p.m., there will be a programme of French music and culture on CKPR-FM, run by A. Nabarra, Modern Languages and A. Macleod, Political Science, in collaboration with A. Cloutier, Lecturer in French-Canadian studies. The programme will be of special interest to the members of the French-speaking community of North-Western Ontario, but it is hoped that students studying French will also take advantage of this opportunity.
