VOLUME 5

NUMBER 8

JULY 20, 1972

High Praise!

Shakespeare-in-the-Streets, the Minneapolis-based touring company of actors, was resoundingly received by good audiences at Lakehead University on July 12 and 13. *Twelfth Night*, *Much Ado About Nothing* and *Two Gentlemen of Verona* were carried off by an extremely competent and exuberant cast of predominantly youthful actors, many of them natives of the Minneapolis - St. Paul area.

The company embodies a refreshing approach to theatre, with the emphasis on audience participation and involvement. Minstrels set the pace before each production; and the evening always closes with an open dialogue between players and audience, where the actors sit on the edge of the stage to talk about themselves and their work.

Minstrels at Work

Shakespeare - in - the - Streets, probably as a result of their open-air approach, have gained considerable insight into the drama and characterization of Shakespeare's comedies. Their enthusiasm is infectious; and if they return to Thunder Bay next year, tickets will definitely be at a premium!

Unique Program in Kenora

The Department of Physical and Health Education of Lakehead University, under the direction of its Chairman, Dr. J.H. Widdop, is offering a unique program in Kenora, Ontario, in conjunction with the Extension Department. B.P.H.E. 101 is a course designed to introduce the prospective teacher of physical and health education to the theory and practice of individual and team activities. Emphasis in this course is upon the elementary principles involved in the teaching of such activities to beginners. Such a course necessarily requires a variety of expert instructors to adequately cover the many games, activities, theories and different pieces of apparatus with which the prospective teacher must be familiar.

The course in Kenora has been divided into six

teaching blocks, one for each week of the course. During any given week there may be three or more instructors at work in their various specialties. The professors and their specialties include; Dr. J.H. Widdop - elementary apparatus, psychology, soccer; Mrs. S. Evans - basketball, folk dance; Mr. G. Garvie - wrestling, football, motor performance; Mr. B. Grozdanovic - gymnastics, handball, soccer; Mr. H. Lockhart - basketball; Mr. W. Mackie - gymnastics, diving, anatomy, health education; Miss V.A. Proyer - field hockey, tennis, psychology of motor performance, Movement; Mrs. L. Vincze - native dance; Mrs. A. Nelson - educational gymnastics, Movement; Miss W. Thompson - volleyball, track and field.

Dr. Widdop reports that close to thirty people are enrolled in this extremely fast-moving and intensive course in Kenora; most are elementary school teachers, with a sprinkling of high school teachers.

Second Language Programs

This summer at Lakehead University there are two "second language immersion" programs - one in English, one in French. The general aim of the programs is to develop skills in reading, writing, understanding and particularly in speaking the second language.

Language Lab in Use

A total of forty-three students are deeply involved in the many aspects of the programs, which offer

intensive training in literature, grammar, spelling, reading, language laboratory practice, directed and free conversation. Even those students studying French are from outside the region for the most part, for the program, under the auspices of the Federal Secretary of State's Office, is designed to promote travel. Emphasis within the programs is on Canadian material and Canadian instruction.

Students are not only involved in classroom study from 9:00 a.m. to 4:00 p.m. every day, but they are totally immersed in the second language through residence living, socializing with their instructors in the residence atmosphere, and through weekend excursions, field trips and picnics. Instructors constantly stimulate and encourage expression in the second tongue.

Dr. M. Colina, Director of the Summer Language Training Program, claims a high degree of success in promoting understanding and expression in the second language and its culture.

This is the second summer in which Lakehead University has been involved in the "second language program". Much of its success is attributed to the total living experience which is promoted by instructors and students being from outside the region, and by their sharing residence living.

National Research Policy

Following are excerpts from a speech delivered by the Honourable Alastair Gillespie, Federal Minister of State for Science and Technology, to a scientific gathering in Ottawa on July 10:

As Minister of State for Science and Technology I am well aware of the many demands on the government for funds to support research and development. Many of these proposals are good and are worthy of support in the general interest of the country. But public funds should not be expended unless there is a reasonable probability of public benefit and all too often the view presented is short-sighted and parochial.

It is up to you and those like you in other areas of technology to explain why your proposed project will benefit Canadians. Politicians are generally held responsible for the expenditure of the public funds which they administer, and rightly so. But they are not experts in specialized fields of science and technology and must rely on the scientist or engineer to explain to the public why his work deserves support.

It was to help the government achieve a broad

and farsighted approach to science and technology that my Ministry was established and I can assure you that as its Minister I look very hard at proposals which involve the expenditure of public funds and use of national resources, especially when the objectives, benefits, spinoffs, or side effects expected are poorly defined or poorly understood... I can picture, a few years from now, a group of scientists aboard a space station - maybe aboard SKYLAB - looking down on earth from space and discussing among themselves the scientific benefits of their research.

Below, on a street of one of our cities, will be a group of the citizens who will have footed the bill and voted their approval for that space venture. As those citizens stand there looking at that little dot in the sky streak past - will they know - will they understand the implications of what those scientists up there are talking about? Will they really have been put in a position to understand how the spaceship they live on - the earth - is being made a more viable and more humane living area by the research being carried out aboard that research space station?

The man who pays the piper may not be able to call the tune on a daily basis, but at least he has the right and the responsibility to hear the tune.

And with today's pressures for public funds, any scientists who lack the renewable ingenuity to get their tune to the public may in future find themselves being treated a little like expendable resources.

Proposed Alterations

This fall the Library will take over considerably more of the library building, and over the next few months alterations will be made in some of the service areas and in the location of stock.

The main changes will be as follows:

- The *Cataloguing Department* will move from the main floor to the ground floor to be located beside the Acquisitions Department.
- Government Publications* will then occupy the vacated area and will be available through the Reference Library.
- The *Acquisitions Librarian* and the *Searching section*, at present located on the second floor, will also move to the ground floor.
- Current newspapers* will be moved back to the second floor.
- The *Reserve collection*, at present at the Circulation Desk, will be housed in the study room next to the Catalogue Hall.

- *Microfilms*, etc. will remain in their present place in the Reference Room.
- *Indexes and abstracts* (i.e. Chemical Abstracts, Mathematical Reviews, etc.) will be brought together in a separate area on the second floor in order to make their use easier.
- The *shelving of the main book collection*, at present on the third floor, will be extended to the fourth floor.

Further ACU Notes

In the July 11 issue of LU WEEK, space did not permit complete information in the article on the Association of Commonwealth Universities.

The article was stimulated by the visit of Mr. Tom Craig to the campus of Lakehead University earlier this summer. Mr. Craig visited various young "emerging" universities across Canada in conjunction with important ACU meetings in St. Catharines and Montreal; and mainly for the purpose of emphasizing the Association's services to member institutions.

While in Thunder Bay, Mr. Craig was able to tour parts of Lakehead University, as well as Confederation College. Among other interviews on campus, Mr. Craig spent considerable time with Mr. Donald Ayre, Secretary of Lakehead University. It is through Mr. Ayre's office that ACU is supplied with up-to-date information about Lakehead University.

Memorial Scholarships

The Canadian Division of the Chartered Institute of Secretaries recently announced the approval of "scholarships on a continuing basis to be offered at Lakehead University in memory of the late Timothy Ryan", Dean of Arts at the University, and chairman of the Institute's Curriculum Committee at the time of his death.

"Such scholarships would be open to graduates of Lakehead University or students currently on course at the University. The Institute will award scholarships on the basis of a nomination from the University President, tenable for the individual student on a calendar year basis, for three years of registration with the Institute."

The value of each scholarship is estimated at \$1,000 over a three year period. Further information regarding this award will be available through the Office of the Dean of Students.

Reminder

Contributions to the University's Scholarship Fund in memory of Timothy Joseph Ryan continue to be payable to Lakehead University. Such contributions should be forwarded to the Office of the Secretary, Lakehead University, Thunder Bay, Ontario.

BIU Increase

The value of the basic income unit, used in calculating support levels for Colleges and Universities, has been set at \$1,825 for the 1973-74 academic year. The Honourable George A. Kerr, Minister of Colleges and Universities, announced today. This represents a 3.4% increase in the unit value, up \$60 from this year's \$1,765.

Bearing in mind that there are unavoidable increases in administrative costs and salaries, the Government believes this level of support will enable the Colleges and the Universities to maintain present standards of excellence and at the same time provide incentives for efficiency, Mr. Kerr indicated.

It is expected that, across the province, formula operating grants to universities will increase by about 9% or \$33 million over the current level, taking into account projected student enrolment for 1973-74 and the weighing factors applied to different programs under formula financing. Because of larger increases in anticipated enrolment at the Colleges of Applied Arts and Technology, the Formula Grants to the Colleges are expected to rise about 18% or \$19 million across the system during 1973-74.

In a letter to the Presidents of the Universities and Colleges announcing the increase, Mr. Kerr stated that the unit value had been established at \$1,825 after thorough consideration by the Government and was intended to permit the institutions "to plan effectively for the 1973-74 fiscal year and to set the appropriate priorities and objectives."

"You are aware, I am sure," the letter continued, "that the Government has always considered education as one of its highest priorities. This announcement, which comes in a period of great fiscal restraint, should indicate to you our strong and continuing commitment in this area."

weekly events

- Thursday
July 20 —Beer Garden with "Love Cycle", Cafeteria, 3 to 9 p.m.
—Thunder Bay Girls Pipe Band, Hillcrest Park, 7:30 p.m.
- Friday
July 21 —Dance, Cafeteria, 9 to 1
—Intimacy Concert, Faculty of Education Building, 7:30 p.m.
- Saturday
July 22 —Movie "Getting Straight", U.C.T., 6:30 and 9 p.m.
- Sunday
July 23 —Movie "Getting Straight", U.C.T., 6:30 and 9 p.m.
- Monday
July 24 —Recent NFB film "Temples of Time", U.C.T., 8:00 p.m. Admission Free.
- Wednesday
July 26 —Movie "Carpetbagger", U.C.T., 6:30 and 9:00 p.m.
—Summer Music '72, Concert, Faculty of Education Building, 8:00 p.m. FREE STUDENT ADMISSION.
—Public Lecture - Dr. Albert Ellis, Family Life Program, Lakehead University, Upper Lecture Theatre, 8:00 p.m. No Admission Charge.
- Thursday
July 27 —Nite Club with "Sea Dog", 9 to 1 in Cafeteria.
- Friday
July 28 —Nite Club with "Sea Dog", 9 to 1 in Cafeteria.
- Saturday
July 29 —Nite Club with "Sea Dog", 9 to 1 in Cafeteria.
—Movie "Love Story", 6:30 and 9:00 p.m. U.C.T.
- Sunday
July 30 —Movie, "Love Story", 6:30 and 9:00 p.m. U.C.T.
- Monday
July 31 —Recent NFB film "Little Burgundy", U.C.T., 8:00 p.m. Admission Free.
- Wednesday
August 2 —Movie "Great White Hope", U.C.T., 6:30 and 9:00 p.m.
- Thursday
August 3 —Beer Garden with "Love Cycle", 3 to 9 p.m.
- Friday
August 4 —Dance, Cafeteria, 9 to 1 a.m.

meetings

- Saturday
August 5 —Movie "Ben Hur", U.C.T., 6:30 and 9:00 p.m.
- Sunday
August 6 —Movie "Ben Hur", U.C.T., 6:30 and 9:00 p.m.
- Wednesday
August 9 —Movie "The Horsemen", U.C.T., 6:30 and 9:00 p.m.
- Thursday
August 10 —Nite Club with "Sweet Blindness", 9 to 1 a.m.
- Friday
August 11 —Nite Club with "Sweet Blindness", 9 to 1 a.m.
- Saturday
August 12 —Nite Club with "Sweet Blindness", 9 to 1 a.m.
—Movie "They Shoot Horses", 6:30 and 9:00 p.m., U.C.T.
- Sunday
August 13 —Movie "They Shoot Horses", 6:30 and 9:00 p.m., U.C.T.
- Friday
August 18 —Dance
