

Academic Advisor System

The Faculty of Arts, through the office of the Dean, announces the introduction of an Academic Advisor System designed to reduce institutional impersonality in students' academic affairs while promoting student-faculty relations.

Each first year student will be assigned a general advisor at registration in September, and will be requested to consult with him on three occasions throughout the year: before the end of September initially, and before the end of November and January on the remaining occasions. Students enrolled in subsequent years at the University, and students who are already committed in certain disciplines, will be assigned advisors in their major subjects.

Prof. D. Crozier

Such a system should make it easier for a student to obtain information about specific courses, which will facilitate his choices in filling out his program. An advisor will have an opportunity to help an individual understand the scholastic demands of his discipline, and to help him meet these demands while achieving the highest academic status consistent with his ability. Hopefully, dialogues will develop which will facilitate each student's integration into university life.

Professor Tim Ryan, the Dean of Arts, announces that Professor Dan Crozier of the Department of English has accepted the responsibility of coordinating the Academic Advisor Program.

Exchange of Scientists

The National Research Council invites applications for visits to Brazil, Czechoslovakia, France and the Union of Soviet Socialist Republics on the basis of agreements with those countries that provide for exchange of scientists and engineers to take place in 1972.

Awards will be made for periods ranging from one month to one year in duration.

In order to qualify, an applicant must be a Canadian citizen, must have completed five years of research beyond the Ph.D. or the equivalent, and must have established contacts or well-proposed visits. Knowledge of the language of the country to be visited, while not essential, is a definite asset.

Financial arrangements vary according to the support offered by the host countries. All proposed visits are subject to acceptance by the host countries.

Applications will be accepted until September 30, 1971 and March 31, 1972, after which times awards will be granted by a Selection Committee on International Scientific Exchanges.

Application forms are available through the office of the Dean of Science. Correspondence should be addressed to:

Office of International Relations
National Research Council of Canada
Ottawa, Ontario

Family Life Program

Currently launched as a two-credit summer course under the direction of the Psychology Department, Lakehead University's Family Life Program is an in-depth course in sex and sexuality. Its purpose is to give people, particularly parents and teachers, sufficient insight into the nature of human sexuality so that they can live happier lives and create healthier learning situations for their children and students.

According to Father Leo Lafreniere, pioneer of the Family Life Program in Thunder Bay, "sexuality has always been shrouded in mystery. The most wonderful accomplishment of a man and a woman, the procreation of a child, remained a mystery until about fifty years ago."

Because of its necessary role in the survival of the human race, "sexuality has always been associated with a religion which made laws and regulations to protect it." But these laws were always based on religious belief rather than on a clear picture of human sexuality.

For example, Old Testament Jews emphasized procreation in order to generate a Messiah. Many early Christians, on the other hand, looked upon sex as a danger-

ous physical diversion which tended to impede spiritual pursuits. As a result, religion instigated many taboos and fostered unnecessary guilt because of its ignorance of the nature of sex and sexuality.

Although it emphasized the holiness of marital union, the Christian religion never came to grips with the purposes of the sexual act before the present century. Insights came gradually. Around A.D. 400, St. Augustine revived emphasis on procreation. A thousand years later, St. Thomas Aquina wrote: "... to impel man to the act whereby the deficiency of the species is aided, God put delight in copulation."

But it was not until 1930 that the Christian Church officially recognized all aims of sexual intercourse, including the procreation and education of children, the expression of love, and the satisfaction of personal needs.

The issue in the twentieth century involves controlling the rate of birth rather than "aiding the deficiency of of the species." The current sexual revolution is a quest for values. Now that facts about sex are common knowledge, younger people demand to know *how* to act. There is a general need for understanding of our sexuality, of our maleness and femaleness, so that we can accept ourselves for what we are and so that we can relate more readily and more responsibly within our families.

The Family Life Program, by exposing people to expert judgements on sex and sexuality, and through encouraging dialogue and discussion, purposes to promote understanding and acceptance of sex and sexuality in human life. The program cannot deny its moral basis (i.e., a genuine respect and concern for self and others), but it does exclude biased preaching from any religious point of view.

Other Universities

The appointment of Mr. B. R. James, B.A., C.A., as Assistant Vice-President Administration of McMaster University has been announced by Dr. H. G. Thode, President of the University. Mr. James will act as deputy to D. M. Hedden, Vice-President Administration, and have special responsibilities in the area of finance.

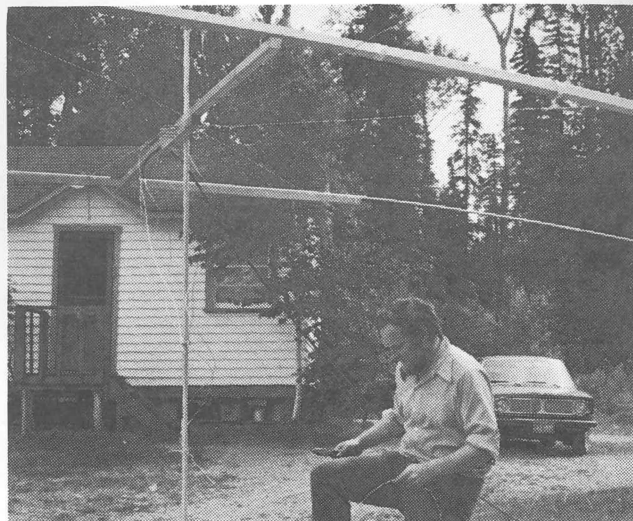

The Honourable Emmett Matthew Hall, Justice of the Supreme Court of Canada, has been appointed Chancellor of the University of Guelph, President W. C. Winegard has announced. Justice Hall, who succeeded the Honourable George Drew when he retired on June 30th, will be installed at the fall Convocation of the University in October.

Ham Field "Day"

According to Jim Wheeler of Engineering, the University Amateur Radio Station along with several staff and students took part in the A.R.R.L. Emergency Field "Day", June 26/27.

Amateurs throughout North America and all American territories hit the hills to operate for twenty-seven (27) hours under emergency conditions, i.e. NO HYDRO... just portable generators and any equipment you can carry to the site,

"We 'set up' at Lake Shebandowan and managed to stay awake and 'on the air' the full 27 hours.

As you can see, our antennas weren't very artistic but they kept us busy putting them up and taking them down as the frequencies changed.

We passed over 750 messages in the name of good ol' LU during the period.

We set out to beat the University of Saskatchewan VE5-US, last year's Canadian Champs. Since it takes several months to tally all the results we are still just hoping.

Next year we may forget about this year's difficulties and want to do it again."

Students wishing to register opinions or suggestions regarding University food services are urged to contact the office of the Dean of Students.

Library Coordination

An Office of Library Coordination, designed to guide and develop a wide range of cooperative activities among the provincially-assisted university libraries in Ontario, has been created by the Council of Ontario Universities.

The aim is to achieve a system of academic libraries which are essentially self-sufficient in providing service for undergraduates, and which are effectively interdependent in serving graduate students, faculty and research needs.

The Council has requested that the Office give high priority to an investigation of centralized technical processing and its alternatives. Cost studies will be conducted on acquisitions, cataloguing, records, production, shelf preparation, and related services in university libraries.

In the examination of alternatives, the experience of university users and other information on existing processing centres will be studied. The targeted completion date for the investigation is late spring 1972.

Bicultural Exchange

Lakehead University is pleased to announce that it will be one of seven Ontario Universities featuring in-depth studies of Canada's two official languages this summer.

The Summer Language Bursary Program was initiated by the Federal Government and is administered by the provincial departments of education. Each student accepted under the program will receive a bursary of \$550 to defray all costs of the six week program.

English-speaking students will experience rigorous study of the French language and culture. French-speaking students will have an opportunity to immerse themselves into the language and customs of English Canadians. The program at Lakehead University will involve thirty English-speaking students from across Canada, who will study under Mr. Andre Cloutier of the University's French Department. Also, thirty French-speaking students from post-secondary institutions in Quebec will study English under Dr. M. A. Colina.

Not only will students learn in morning and afternoon classroom sessions, but they will also find it necessary to put their learning to work, as they are expected to conduct their daily life in the language they are studying.

In their daily instruction the students will have full access to all facilities of the University's Language Department. All audio-visual equipment in the Language Labs will be utilized; also, the library is expected to be of great benefit to all the students involved.

The program at Lakehead University is being administered through the office of the Dean of Students, as well as that of the Director of Extension and Summer School.

Everyone involved in the program is optimistic about this unique opportunity to give Canadian students a better understanding of Canada, and the problems presented by Canada's biculturalism.

Book Preparation

Dr. Gerhard P. Knapp, Assistant Professor of German, has been awarded a research grant from the Chancellor's Fund. In cooperation with various outstanding experts in Canada, the United States and Germany, he is preparing the publication of a book on Friedrich Dürrenmatt, the well-known Swiss Dramatist. Among the contributing scholars is Dr. A. A. Scholl, Assistant Professor of French. Dr. Knapp expects the publication of this study in the coming year. He has also recently published an article on Francis Bacon's theories of method and invention in the well-known periodical "Zeitschrift für Philosophische Forschung".

Privacy Threatened?

The 40th Annual Couchiching Conference on public affairs takes place at Geneva Park, Ontario, between August 4th and 8th, 1971. This conference will examine whether individual privacy is being threatened by social and technological changes and, if so, what steps might be taken to safeguard our privacy.

Government officials, academicians, businessmen, lawyers, authors and journalists will participate as speakers and panelists during the five day conference which will examine such areas as Privacy, the Law, and Law Enforcement; Computers and "The Dossier Dilemma"; Privacy and the Media; and Privacy and Urban Life.

The keynote address and summary discussions will be handled by Dr. Alan F. Westin, Professor of Public Law and Government at Columbia University and a world authority on the subject.

Conference registration forms are available at the Information and Publications Office.

weekly events

**Sunday
July 25** Film in U.C.T. 6:30 and 9:30, Adm. 50¢
"Oedipus the King"

**Tuesday
July 27** Classic Film Series courtesy of General Foods, Ltd., in U.C.T., 7 p.m., Adm. FREE
"The Light of Experience" & "The Pursuit of Happiness".

**Wednesday
July 28** Music Concert - Mozart - Piano Quartet in G Minor, in the Faculty of Education Theatre, 7:30 p.m., Adm. \$1.50.

Film, U.C.T. 6:30 and 9:30, Adm. 50¢,
"St. Valentines Day Massacre".

**Friday
July 30** Dance in Cafeteria from 9 to 1, Admission \$1.00.

**Sunday
August 1** Film, U.C.T., 6:30 to 9:30, Adm. 50¢,
"Kiss the Other Sheik"

**Monday
August 2** A.M.S. Nite Club in Cafeteria from 9 to 1 "Eight of a Kind"

**Tuesday
August 3** Classic Film Series courtesy of General Foods, Ltd., in U.C.T., 7 p.m., Adm. FREE, "The Smile of Reason" and "The Workshop of Nature".

A.M.S. Nite Club in Cafeteria from 9 to 1 "Eight of a Kind".

**Wednesday
August 4** Music Concert - Beethoven - Trio for piano, violin, cello, in the Faculty of Education Theatre, 7:30 p.m., Adm. \$1.50

Film, U.C.T., 6:30 and 9:30, Adm. 50¢,
"Myra Breckenridge"

A.M.S. Nite Club in Cafeteria from 9 to 1 "Eight of a Kind"

**Thursday
August 5** Nite Club in Cafeteria

**Friday
August 6** Nite Club in Cafeteria

**Saturday
August 7** Nite Club in Cafeteria

New Course

The Department of Psychology announces the introduction of a new course, "Behaviour and Drugs" (Psychology 3e6) starting September, 1971.

The course will deal with the various aspects of interaction between drugs and behaviour on a scientific basis. The course will cover basic principles of drug action, methods of investigating drug effects, mechanisms of drug penetration into the nervous system, historical development of drug effects on behaviour, classification of drugs, analysis of psychotropic drug effects, abnormal behaviour and drugs, drug addiction (tolerance and dependence) and behavioural toxicity, and the therapeutic applications of drugs.

Prerequisite for the course is Psychology 1a6 or permission of the instructor. This course will be offered on Mondays and Wednesdays from 7:00 to 8:30 p.m. in room MB-1075, and will be taught by Dr. K. Paul Satinder.
